HIGH PERFORMANCE SEALANTS, ADHESIVES & PU FOAMS

2024

About SOUDAL

Soudal is Europe's largest independent manufacturer of sealants, adhesives and PU foams for both professionals and private users. With more than 4,000 employees, a turnover of 1.34 billion euros (\$2.15 billion AUD) and 29 production sites on five continents, this 100% Belgian family business, founded by Vic Swerts, has grown into a global player and expert in chemical construction and industry specialities. Extensive investments in R&D, a long-standing vision of innovation and adaptations to local market needs laid the foundation for its excellent performance. Soudal is accredited as Best Managed Company and Top Employer.

Vic Swerts (Chairman-Founder)

Our VALUES

(YOU) BUILD THE FUTURE

THREE CORE VALUES

Uncomplicated sincerity

Above all, we value integrity and respect. We always try to be honest with each other and all our stakeholders. We keep this uncomplicated by having short lines of communication, keeping procedures simple, and working in a down-to-earth way.

At Soudal, we keep trying until we win. We always want to learn and try new things to keep growing.

Ambitious bravery

Shared loyalty

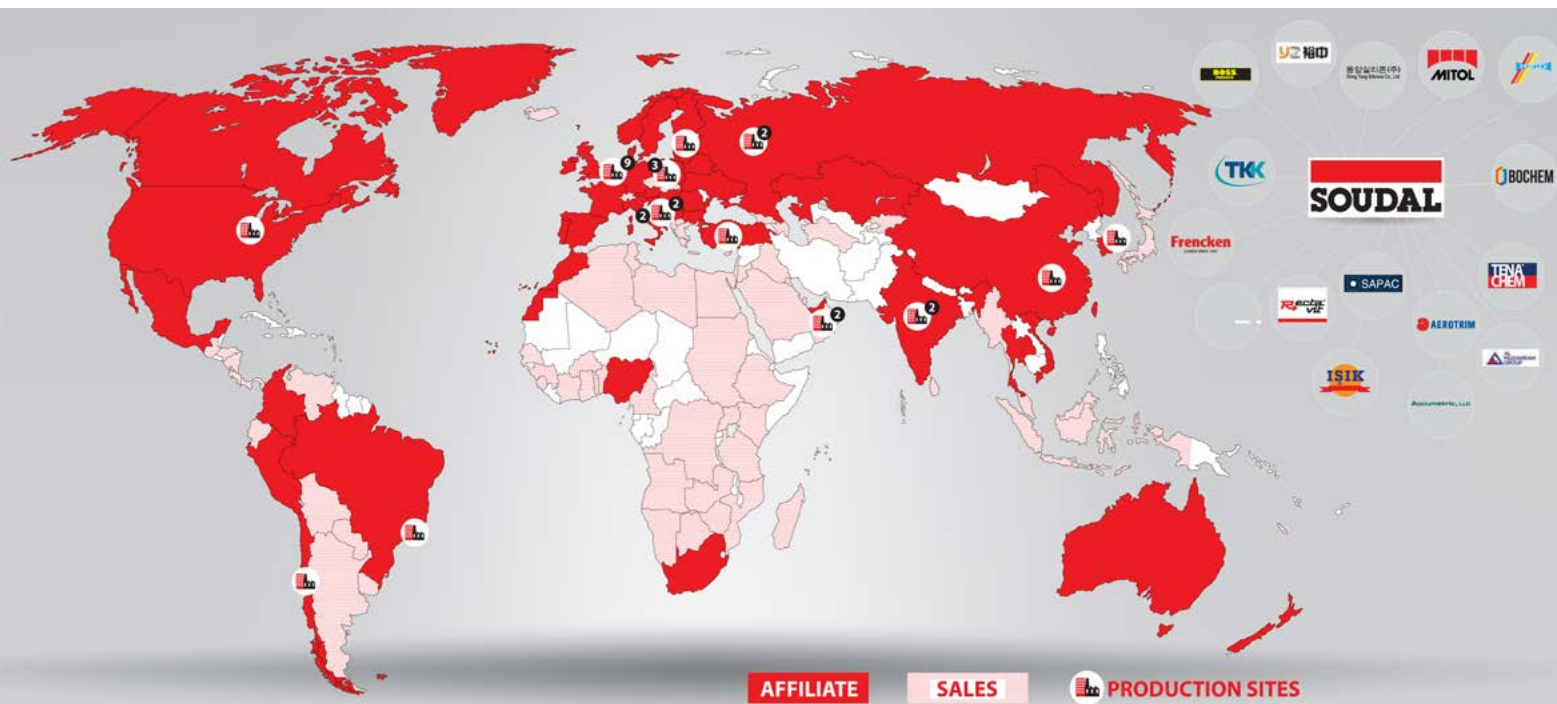

We are 100% a family business, and everyone within Soudal belongs to that family. Together, we want to continue to strive for loyalty and a positive environment.

Employees are our most important assets. Daring entrepreneurship involves the challenging process of bringing together a unique team of people. Employees, partners and customers are not hollow concepts. They are about people, about individuals who enable the entrepreneur to realise an ambition. So you have to surround yourself with good, strong people who know it and can do it better than you.

Mission

Soudal aims to become the world's largest independent manufacturer and service-oriented supplier of silicones, adhesives and PU foams for professional construction, retail and industry. Soudal operates in a safe, sustainable, high-quality and profitable manner to perpetuate the continuity of the business and values the satisfaction of its employees as well as the respect of the local community.

Vision

Soudal continues to find solutions to current and upcoming global challenges. Innovation and progress are the keywords of preference. We want to be a pioneer for the professional and retail construction sector. We are going full steam ahead for a better future.

In its operation, Soudal aims to become and remain a leader by manufacturing and selling quality products in selected market segments, anywhere in the world. We are constantly improving these products. Soudal aims to increase its rate of innovation and develop new areas of activity.

Our PRODUCTS

Adhesives

In addition to the established values within the adhesive range, such as wood and parquet adhesives, water-based assembly adhesives, decorative adhesives and PVC adhesives, Soudal continues to work on further growing its successful polymer-based adhesive sealants, such as Fix All adhesives, for example.

In addition, Soudal is very strongly committed to the further expansion of its industrial adhesive range, using various 1- or 2-component-based technologies. Trends in the market, such as gluing glass into the window frame, do not go unnoticed: a special 2K silicone sealant was developed for this emerging application with industry partners.

Foams

For decades, Soudal has been a leading manufacturer of foams and foam solutions for many applications including construction: insulating, filling, mounting, gluing. The range has become very diverse in terms of technology, packaging and hardware. In addition to classic 1-component foams with a variety of properties,

Soudal also offers complete 2K systems for special insulation applications, such as filling window profiles. Elastic foams occupy a special place in the range, as they provide durable insulation and avoid thermal bridges over long periods of time in many building applications.

Genius Gun represented a revolution in lowering the threshold for the DIY user who can now get to work with more control and precision, and use the same pack again smoothly for the next job.

With the isocyanate-free SMX® foam, Soudal then set new standards in foam technology, but in the meantime water-based foams, for example, are also available, marking another important step in a sustainable product range.

Chemical anchor

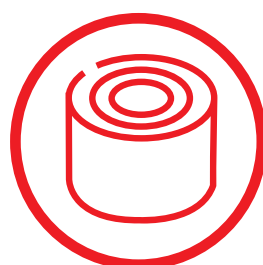

Soudal developed the chemical anchor to enable heavy loads in both hollow and full construction materials to be borne. Stair railings, awnings or boilers are examples of loads that can be securely fastened thanks to our ETA-certified (European Technical Assessment) chemical anchor.

Coatings

Soudal offers coatings for all kinds of applications. Some examples include liquid membranes for air and vapour sealing surfaces, floor and wall connections, waterproof coatings for roof applications and repairs.

A great example is the Soudatight range, a set of products that contribute to achieving the target energy performance of buildings (NZEB). Soudatight is extremely easy to apply (brush or spray) and greatly improves the airtightness of the building envelope. A passive house certificate and many other test reports provide the various stakeholders in the construction process with the necessary assurance.

Tapes and membranes

For various applications in construction and industry, Soudal offers different types of mounting tapes, airtight sealing tapes and membranes. Within the context of energy performance of buildings, airtight sealing tapes were developed for sealing seams and gaps in under-roof and façade films. In addition, window films were given a permanent place in the range.

As well as the standard version of membranes based on EPDM and non-woven fleece, focus is now also on the very fast-growing self-adhesive variants of these window films. These provide an air and impact rain-tight seal between external joinery and structural shell, a very important building node in any construction.

Sealants

Soudal's sealants are available for both indoor and outdoor applications. The range includes silicone sealants in various colours, including for sanitary and glazing applications, paintable acrylic sealants, joint sealants for fire-resistant and fire-retardant applications, and polymer and polyurethane sealants for various façade and floor applications.

Here, too, research and development led to innovative solutions. Our latest innovation is HMX® technology, which combines the best of both worlds: permanent elasticity and superior adhesion of a silicone, combined with the ability to paint over it and optimal processing ability of an acrylate. Moreover, HMX® products have excellent water and weather resistance. HMX® technology has since received several sustainability and quality labels.

Soudal also supplies sealants for industrial solutions, such as sealing products for double-glazing production.

FIXES, BONDS AND SEALS EVERYTHING TO EVERYTHING#

T-REX Crystal

DESCRIPTION

T-Rex® Crystal is the most versatile transparent adhesive and sealant on the market. Due to its high translucency it can be used for invisible sealing and bonding. T-Rex® Crystal is mould resistant for sanitary areas and is certified food safe for food contact. Once cured it forms a strong and elastic waterproof seal. WaterMark Certified, suitable for contact with drinking water.

APPLICATIONS

Invisible sealing and bonding. Transparent and elastic bonding in construction and building applications. Suitable for sealing bathrooms and kitchen where mould is likely to grow. Flexible to 750%.

- Paintable immediately
- Solvent free
- Mould resistant
- Interior & exterior
- Isocyanate free

Options

- 132603 - 125ml Tube: Crystal
- 121969 - 290ml Cartridge: Crystal

T-REX Power Fast Grab

DESCRIPTION

T-Rex® Power is a versatile adhesive & sealant with 1 second immediate grab onto all common substrates. It has incredible high end strength of 320 kg per 10 cm² and due to its Fast Grab, it can be used for applications where immediate grab is required. Once cured it forms a strong and elastic waterproof seal. WaterMark Certified, suitable for contact with drinking water.

APPLICATIONS

Sealing and bonding applications for heavy materials. Sealing of floor and wall joints. Sealing of joints around bathrooms and kitchen. Installation of mirrors & signs onto vertical surfaces without slipping.

- High green strength
- UV resistant
- Bonds to wet surface
- Internal & external
- Quick end-strength buildup
- Isocyanate and solvent- free

Options

 121970 - 290ml Cartridge: Steel Grey	 147559 - 600ml Foil Pack: Steel Grey
 121968 - 290ml Cartridge: Bright White	 127507 - 600ml Foil Pack: Bright White
 124435 - 290ml Cartridge: Jet Black	
 128462 - 290ml Cartridge: Quick Silver	
 128463 - 290ml Cartridge: Beach Sand	

T-REX Power Fast Grab Clear

DESCRIPTION

T-Rex® Power Fast Grab Clear is an adhesive with 1 second immediate grab onto all common substrates. It has incredible high end strength of 320 kg per 10 cm² and due to its Fast Grab, it can be used for applications where immediate grab is required.

APPLICATIONS

High green strength / quick build up of end strength. Bonding applications for heavy materials. Sealing of floor and wall joints. Sealing of joints around bathrooms and kitchen. Installation of mirrors & signs onto vertical surfaces without slipping.

- Clear colour
- Solvent free
- UV resistant
- High shear strength
- Bonds to wet surface
- Flexible

Options

 134912 - 290ml Cartridge: Clear

T-REX Flex

DESCRIPTION

T-Rex® Flex is a highly elastic sealant and adhesive for a wide range of bonding, sealing, and filling applications. Due to its high flexibility of 750%, it will absorb the movement of the materials onto which it is applied and is mould resistant for sanitary areas. Once cured it forms a strong and elastic waterproof seal.

APPLICATIONS

Sealing and bonding of natural stones like marbles, granite, etc. Sanitary sealing and bonding in kitchen, bathroom, showers. Sealing of floor joints and walls. Strong elastic bonding in vibrating constructions.

- Flexible to 750%
- Paintable immediately
- Solvent free
- Mould resistant
- Interior & exterior
- Isocyanate free

Options

 132602 - 125ml Tube: Bright White
 137369 - 290ml Cartridge: Bright White
 137415 - 290ml Cartridge: Steel Grey

T-REX Floor & Wall Adhesive

DESCRIPTION

A ready-to-use, high quality construction adhesive for full surface bonding based on SMX Polymer technology which is chemically neutral and fully elastic after cure. Contains no solvent and suitable for primerless adhesion to most construction materials.

APPLICATIONS

Perfect for difficult installation for wet surfaces, tile on tile, natural stone, stainless steel and floor coverings. Bonding of all types of building materials onto all porous and non-porous surfaces. Bonding of sheet materials on wall and floor- tiles, stainless steel panel, splashbacks, wooden panels, natural stones cladding, etc.

- High bond strength
- All materials*
- Easy to trowel
- Internal & external
- Permanently flexible

Options

- 134899 - 4kg Bucket: White

T-REX Turbo

DESCRIPTION

T-Rex® Turbo is an adhesive-sealant with very fast strength build-up, ideal for applications where super-fast bonding is required. Develops a strong bond on porous surfaces in thin layer after only 20 minutes, it will be fully set after 3 hours. Once cured it forms a strong and elastic waterproof seal.

APPLICATIONS

Bonding applications of porous and non-porous surfaces. Strong elastic bonding of panels, profiles, etc. on most common substrates. Bonding in building, construction and metal industry.

- Hand tight in 20 mins
- Fully sets in 3 hours
- Permanently elastic
- Internal & external
- UV resistant
- Isocyanate free

Options

- 132601 - 125ml Tube: White
- 128371 - 290ml Cartridge: White

T-REX X-Treme

DESCRIPTION

T-Rex® X-Treme is a high strength adhesive with extreme tack for immediate bonding of extremely heavy materials without additional support. Due to its extreme tack, it is capable of carrying heavy loads up to 400 kg/m². Perfect for installing heavy items without slipping.

APPLICATIONS

For all bonding applications where high initial grab is required. Elastic bonding and installation of signage, panels, profiles for vertical and horizontal without support. Heavy duty bonding in all weather conditions and on most surfaces and even damp or wet. Elastic structural bonding in automotive applications: buses, trains, trucks, caravans, etc.

- Paintable
- High bond strength
- Permanently flexible
- Internal & external
- 400 kg/m² initial tack
- Isocyanate free

Options

- 134841 - 290ml Cartridge: White
- 134842 - 290ml Cartridge: Black

SMX25 Flex & Seal

DESCRIPTION

High quality, low modulus, one component, permanently highly flexible joint sealant with higher viscosity. Based on SMX® Polymer, it has a Shore A hardness of 25 and can accommodate movement of $\pm 25\%$. Can be sanded and painted with most type of paint. Cures to form a strong, flexible, waterproof seal and bonds to the widest range of substrates.

APPLICATIONS

Ideal for a wide range of sealing applications including - expansion joints, masonry & precast concrete joints, can be used for damp surfaces such as bathroom & kitchen area, for walls, window, door frames and perimeter joints, for sealing expansion joints, concrete panel joints, brickwork & block-work joints, etc.

- Highly elastic
- Low modulus
- UV resistant
- Higher viscosity
- Internal & external
- Isocyanate free

Options

 152769 - 290ml Cartridge: Black	 130249 - 600ml Foil Pack: Dark Grey
 152770 - 290ml Cartridge: Concrete Grey	 130251 - 600ml Foil Pack: Off White

SMX35 Seal & Stretch

DESCRIPTION

High quality, single component, permanently flexible joint sealant. Based on SMX® Polymer, it has a Shore A hardness of 40 and can accommodate movement of $\pm 20\%$. Can be sanded and painted with most types of paint. Once cured forms a strong, flexible, waterproof seal and bonds to the widest range of substrates

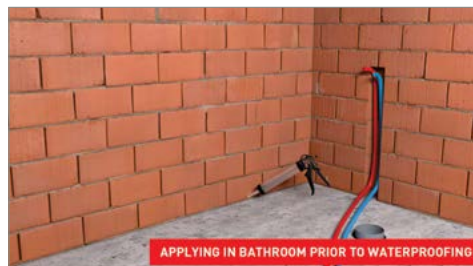

APPLICATIONS

Ideal for a wide range of sealing applications including - expansion joints, joints under waterproofing membranes, masonry and precast concrete joints, for sanitary - bathroom and kitchen areas, for walls, window, door frames and perimeter joints, for water retaining structures, for lap joints in roofing, guttering and cladding

- Elastic
- Mould resistant
- UV resistant
- Paintable
- Internal & external
- Isocyanate free

Options

 124619 - 600ml Foil Pack: Black
 124618 - 600ml Foil Pack: Concrete Grey
 124598 - 600ml Foil Pack: White

SMX50 Seal & Stick

DESCRIPTION

High quality, fast curing, single component flexible adhesive and sealant with high adhesive strength. Based on SMX® Polymer, it has a Shore A hardness of 40 and can accommodate movement of $\pm 20\%$. Can be sanded and painted with most types of paint. Once cured forms a strong, flexible, waterproof seal and bonds to the widest range of substrates

APPLICATIONS

Ideal for a wide range of bonding and sealing applications in construction and industrial including - for trafficable expansion joints, for trafficable pavement floors and perimeter joints, joints under waterproofing membranes, for sanitary, bathroom and kitchen areas, for lap joints in roofing, guttering and cladding.

- Trafficable
- Fast curing
- Sealing & bonding
- Elastic
- Internal & external
- Isocyanate free

| • CONCRETE | • GLASS | • PVC |
| • PLASTER | • LEAD | • SYNTHETICS |

* not suitable for PE, PP, or Teflon

Friendly to the environment and the user; no solvents, halogens, acids or isocyanates.

- Waterproof
- Odourless
- Paintable
- Quick & easy

Fix ALL Crystal

DESCRIPTION

SUPER CLEAR sealant, adhesive and filler. 100% crystal clear. Can be applied in all weather conditions. Internal and external use. Virtually odourless. Primerless adhesion on most construction materials, including wet and damp surfaces. Paintable with most paints. Non yellowing - UV resistant. Contains fungicides - suitable for sanitary applications. Food safe. Highly flexible.

APPLICATIONS

For all bonding, sealing & filling applications where transparency of the final bond or seal is important. Heavy duty bonding and sealing in all weather conditions, on most surfaces. Paintable elastomeric sealing and bonding. Sanitary sealing and bonding - kitchens, bathrooms, showers, etc.

- 100% crystal clear
- Primerless adhesion
- Virtually odourless
- All weather use
- Highly flexible
- Mould resistant - XS1 fungicide
- Food safe
- Tested according to FDA regulations CFR 21 & 177.2600 (e)

Options

- 118779 - 290ml Cartridge: Crystal Clear
- 131080 - 125ml Tube: Crystal Clear

Fix ALL X-Treme Power Express

DESCRIPTION

EXTREME TACK high strength elastomeric adhesive with enhanced mechanical properties and speed of curing. The ULTIMATE in initial grab strength - 400kg/m². The fast setting adhesive is hand tight after only 30 minutes. Can be applied in all weather conditions. Internal and external use. Virtually odourless. Primerless adhesion on most construction materials, including wet and damp surfaces.

APPLICATIONS

For all bonding applications where initial grab and final bond strength is extremely critical. Heavy duty bonding in all weather conditions, on most surfaces. Bonding of porous natural stone surfaces such as marble and limestone.

- Extreme tack
- Ultimate initial grab - 400kg/m²
- Very high final mechanical properties
- Fast build up of strength
- Primerless adhesion
- Virtually odourless
- All weather use

Options

- 154560 - 290ml Cartridge: White

Fix ALL Flexi

DESCRIPTION

MULTI USE sealant, adhesive and filler with high flexibility. Can be applied in all weather conditions. Internal and external use. Virtually odourless. Primerless adhesion on most construction materials, including wet and damp surfaces. Paintable with most paints. Non-staining on porous natural stones. Contains fungicides - suitable for sanitary applications.

APPLICATIONS

For all bonding, sealing & filling applications in all weather conditions, on most surfaces. Paintable elastomeric sealing and bonding. Bonding & sealing of porous natural stone surfaces such as marble and limestone. Sanitary sealing and bonding - kitchens, bathrooms and showers.

- Multi use
- Primerless adhesion
- Virtually odourless
- All weather use
- Highly flexible
- Mould resistant - XS1 fungicide
- Non staining - conforms to ISO 16938-1
- Conforms to ISO 11600 F 20 HM
- ISEGA - tested for use on foodstuffs related areas
- Food safe

Options

- 131082 - 125ml Tube: White
- 131482 - 290ml Cartridge: White
- 131481 - 290ml Cartridge: Grey

Fix ALL Floor & Wall

DESCRIPTION

TROWELLABLE full surface, elastomeric adhesive. No mixing required. High initial grab. Can be applied on wet and damp surfaces, internally or externally. No solvents or odours. Primerless adhesion on most construction materials. Non-staining on porous natural stones. Suitable for sanitary applications.

APPLICATIONS

Elastomeric bonding of many types of sheet materials on walls and floors - tiles, stainless steel panel, splashbacks, wooden paneling, carpet tiles, natural stone cladding, PVCu hygienic cladding. No mixing or primer required. Can be used on damp and difficult substrates, horizontally or vertically. Indoor and outdoor use.

- Trowellable
- No mixing
- Primerless adhesion
- Virtually odourless
- All weather use
- Full surface adhesive
- Mould resistant

Options

- 120137 - 4kg Bucket: White

Fix ALL High Tack

DESCRIPTION

SUPER STRONG sealant, adhesive and filler with high initial tack. Can be applied in all weather conditions. Internal and external use. Virtually odourless. Primerless adhesion on most construction materials, including wet and damp surfaces. Paintable with most paints. Nonyellowing - UV resistant. Contains fungicides - suitable for sanitary applications. Very high final mechanical properties.

APPLICATIONS

For all bonding, sealing & filling applications where initial grab and final bond strength is important. Heavy duty bonding and sealing in all weather conditions, on most surfaces. Paintable elastomeric sealing and bonding. Bonding of porous natural stone surfaces such as marble and limestone. Sanitary sealing and bonding.

- Super strong
- High initial tack
- Very high final mechanical properties
- Mould resistant - XS1 fungicide
- Primerless adhesion
- Virtually odourless
- All weather use
- Conforms to ISO 11600 F 20 HM

Options

Fix ALL High Tack Invisible

DESCRIPTION

SUPER STRONG transparent adhesive with high initial tack. Can be applied in all weather conditions. Internal and external use. Virtually odourless. Primerless adhesion on most construction materials, including wet and damp surfaces. Paintable with most paints. Nonyellowing - UV resistant. Very high final mechanical properties.

APPLICATIONS

For all bonding where a high initial grab and final bond strength is important. Heavy duty bonding in all weather conditions, on most surfaces. Paintable elastomeric bonding. Bonding of porous natural stone surfaces such as marble and limestone. Sanitary sealing and bonding.

- Super clear
- Super strong
- High initial tack
- Very high final mechanical properties
- Primerless adhesion
- Virtually odourless
- All weather use

Fix ALL Turbo

DESCRIPTION

SUPER FAST elastomeric adhesive. Rapid strength build up after 20 minutes, reaching final bond strength after 3 hours. High initial tack. Can be applied in all weather conditions (including wet and damp surfaces), internally and externally. No solvents or odours. Primerless adhesion on most construction materials.

APPLICATIONS

For all elastomeric bonding applications where adhesive build up speed is highly critical or important. Heavy duty bonding and sealing in all weather conditions, on most surfaces. Bonding of porous natural stone surfaces such as marble and limestone.

- Super fast
- Rapid strength build up after 20 minutes
- 3 hours - final bond strength
- Primerless adhesion
- Virtually odourless
- All weather use

Options

- ☐ 122236 - 290ml Cartridge: White
- ☐ 131077 - 125ml Tube: White

Pool Fix

DESCRIPTION

SMX® hybrid polymer based, high strength flexible adhesive and sealant for the repair of mosaic tiles and other tiles in the surrounding area of swimming pools. Can also be used to repair small cracks and for the sealing of swimming pool elements. Bonds to most types of surfaces, even when slightly damp.

APPLICATIONS

Specially developed for the repair and fixing of mosaic tiles and swimming pool tiles. Sealing and bonding of swimming pool elements such as skimmers, drains, valves, openings. Temporary repair of small leaks. Repair and strengthening of damaged metal and polyester surfaces. Not to be used for applications in permanent immersion.

- SMX® hybrid polymer
- Permanently flexible
- UV stable
- Virtually odourless
- Aqua transparent blue colour

Options

- 132196 - 290ml Cartridge: Crystal Clear

Soudaseal® 2K

DESCRIPTION

TWO COMPONENT super fast curing hybrid polymer adhesive and sealant. For use in elastical bonding applications where fast curing is required. Fast strength build-up. Fast curing. High performance mechanical properties. Permanently elastic after curing. Does not contain isocyanates, silicone and solvents. Cures without the presence of atmospheric moisture.

APPLICATIONS

Bonding and sealing applications in industrial, automotive, marine, construction and building areas. Bonding between metal surfaces, coated surfaces and many plastics. Elastic bonding applications in car, coach, caravan and train industries where fast curing and strength build up is required. Full surface bonding of non porous (sheet) material and large areas which are not porous enough to let atmospheric moisture through.

- Two component hybrid polymer sealant & adhesive
- Super fast cure speed
- Cures without atmospheric moisture
- Solvent, silicone and isocyanate free
- Virtually odourless
- Static mixer also available

Options

- 119245 - 290ml Cartridge: Grey

Soudaseal® 260CC

DESCRIPTION

High quality, low modulus, one component, permanently flexible joint adhesive sealant.

APPLICATIONS

Ideal for a wide range of elastic structural bonding applications where a tough and rigid bond is required.

- Excellent adhesion on nearly all surfaces, even if slightly moist.
- Very good mechanical characteristics.
- Long open time.
- High elasticity – movement accommodation up to $\pm 20\%$
- Free of isocyanates, solvents, halogens and acids
- Suitable for powder coating ovens

Options

- 112611 - 600ml Foil Pack: White

SOUDAFLEX

FOR SEALANTS YOU CAN RELY ON,
RELY ON THE EXPERTS IN
SEALANTS

SOUDAL

PROFESSIONAL GRADE POLYURETHANE
SEALANTS FROM SOUDAL

Soudaflex 45FC PRO

DESCRIPTION

Soudaflex 45FC PRO is a high quality, neutral, elastic, 1-component construction joint and adhesive sealant based on polyurethane.

APPLICATIONS

All sealing and bonding applications in the building industry. Connection joints between window- and doorframes and walls. Interior and exterior floor joints. Bonding of roof tiles. Expansion joints between many different construction materials. Structural bonding in vibrating constructions.

- Very easy to apply
- High modulus
- Excellent resistance to UV radiation
- Permanently elastic after curing
- Bubble-free curing
- Very good adhesion on many materials
- Can be painted with most types of paint systems
- Excellent resistance to many chemicals

Options

- 146020 - 600ml Foil Pack: Grey
- 146018 - 600ml Foil Pack: Black
- 146019 - 600ml Foil Pack: White

Soudaflex 42FX

DESCRIPTION

Soudaflex 42FX is a high quality, elastic, 1-component PU sealant and adhesive.

APPLICATIONS

All sealing and bonding applications in the building industry. Sealing joints in concrete floors. Sealing between facade elements. Also suited for bonding applications

- Very good adhesion on many materials
- Permanently elastic
- Excellent weatherability
- Easy to apply

Options

- 147687 - 600ml Foil Pack: Concrete Grey
- 146956 - 600ml Foil Pack: White
- 146913 - 600ml Foil Pack: Black
- 158276 - 300ml Cartridge: Grey
- 158275 - 300ml Cartridge: Black
- 158277 - 300ml Cartridge: White

Soudaflex 20LM

DESCRIPTION

Medium LOW modulus polyurethane based sealant. Very easy to apply. Stays elastic after curing. Very good adhesion on many materials. Excellent resistance to many chemicals. Developed especially for concrete applications. Paintable with some types of paint, after curing.

APPLICATIONS

All usual building joints with high movement. Connection joints between window and door frames and walls. Expansion joints between many different construction materials. Joints with large movement.

- Low modulus polyurethane sealant
- Permanently flexible
- Excellent adhesion
- Conforms to ISO 11600 F 25 LM
- Colour range available

Options

- 126923 - 600ml Foil Pack: Concrete Grey
- 127291 - 600ml Foil Pack: Black
- 127290 - 600ml Foil Pack: White

Soudaflex® 33SL

DESCRIPTION

SELF-LEVELLING polyurethane flooring sealant. Very easy to apply. Stays elastic after curing. Very good adhesion on many materials. Excellent resistance to many chemicals. Developed especially for concrete flooring applications. No bubble formation within sealant as a result of high temperatures or humidity. Non-staining on natural stone and concrete. Resistant to many fuels and other chemicals.

APPLICATIONS

Flooring expansion joints where high movement is expected. Self-levelling up to a maximum slope of 3%. Sealing flooring joints where exposure to fuel and oil is expected e.g. garages. Resistant to splash and spillage contact from hydraulic fluids, lubricants, oils, petrol and many chemicals. Conforms to DIN EN 14187-4, DIN EN 14187-5 and DIN EN 14187-6

- Self-levelling polyurethane flooring sealant
- Permanently flexible
- Non-staining on natural stone and concrete
- Resistant to lubricants, oils, petrol and chemicals

Options

130635 - 600ml Foil Pack: Concrete Grey

Soudaflex® 36SFL

DESCRIPTION

PREMIUM QUALITY polyurethane flooring sealant. Very easy to apply. Stays elastic after curing. Very good adhesion on many materials. Excellent resistance to many chemicals. Developed especially for concrete flooring applications. No bubble formation within sealant as a result of high temperatures or humidity. Non-staining on natural stone and concrete. Resistant to many fuels and other chemicals.

APPLICATIONS

Flooring expansion joints where high movement is expected. Sealing flooring joints where exposure to fuel and oil is expected e.g. garages. Resistant to splash and spillage contact from hydraulic fluids, lubricants, oils, petrol and many chemicals. Conforms to DIN EN 14187-4, DIN EN 14187-5 and DIN EN 14187-6

- Polyurethane flooring sealant
- Permanently flexible
- Non-staining on natural stone and concrete
- Resistant to lubricants, oils, petrol and chemicals

Options

130725 - 600ml Foil Pack: Concrete Grey

Aquaswell

DESCRIPTION

POLYURETHANE pipe and cable sealant which swells up in contact with water to create a water and gas tight seal - up to 5 bar (DVGW VP-601). Very good adhesion on concrete, most metals and PVC. Very easy application in both horizontal and vertical applications. Swells up to 450% of its original volume when in contact with water. Stays elastic after curing. Returns to its original shape after swelling.

APPLICATIONS

Water sealing pipe and cable penetrations. Water sealing concrete joints.

- POLYURETHANE pipe and cable sealant
- Water and gas tight up to 5 bar (DVGW VP-601)
- Swells up to 450% of its original volume in contact with water
- Stays elastic after curing
- Returns to its original shape after swelling

Options

124909 - 600ml Foil Pack: Champagne

All Purpose Silicone

DESCRIPTION

For all sealing, waterproofing and bonding applications where protection against mould and mildew is required. The ultimate all rounder silicone suitable to the broadest range of applications. Offers strong adhesion to ceramics, glass, aluminium (including powder coated & anodised), PVC, stainless steel, zinc & galvanised coated surfaces, timber, concrete, fibreglass, laminate, painted surfaces, etc. Suitable for contact with drinking water as tested to AS 4020.

APPLICATIONS

Suitable for a wide range of applications including - Bathrooms & Kitchens for sealing baths, sinks, toilets, showers, tiles, plumbing fixtures, glass, tiles, etc. Roofs & Gutters for sealing of guttering, flashings, cladding, roofing, down pipes, ducting, lap joints, sheet metal, etc, available in matching Colorbond® metal. Windows & Glazing for sealing around windows, display cabinets, frames and architraves, etc. .

- Roof & gutter
- Mould resistant
- Kitchen & bathroom
- Food safe*
- Glass & glazing
- Water potable

Bathroom & Kitchen Silicone

DESCRIPTION

For all sealing, waterproofing and bonding applications where protection against mould and mildew is required. Offers strong adhesion to glass, tile, ceramics, aluminium, metals (including powder-coated & anodised), painted surfaces, fibreglass, stainless steel. For best performance clean non-porous surfaces with Soudal Cleaner & Degreaser.

APPLICATIONS

A quality, elastic neutral cure silicone suitable for a wide range of applications including sealing baths, sinks, toilets, showers, tiles, plumbing fixtures, glass, tiles, etc.

- Highly elastic +-25%
- Superior adhesion
- Mould resistant
- Internal & external
- Excellent UV resistant
- Neutral cure

Options

- 122783 - 300ml Cartridge: White
- 122784 - 300ml Cartridge: Translucent

Glass & Glazing Silicone

DESCRIPTION

For all sealing, waterproofing and bonding applications where long term protection and weatherproofing is required. Offers strong adhesion to glass, tile, aluminium, metals (including power-coated & anodised), brick, concrete, painted surfaces, fibreglass, stainless steel, zinc & galvanised coated surfaces, etc. For best performance clean non-porous surfaces with Soudal Cleaner & Degreaser.

APPLICATIONS

A quality, flexible, neutral cure silicone suitable for a wide range of applications including sealing around glass, windows, display cabinets, frames and architraves, etc.

- Highly elastic +-25%
- Non slump
- Superior adhesion
- Internal & external
- Excellent UV resistant
- Neutral cure

Options

- 127781 - 300ml Cartridge: Matte Black
- 127782 - 300ml Cartridge: Translucent

Roof & Gutter Silicone

DESCRIPTION

For all sealing, waterproofing and bonding applications where protection against exterior conditions is required. Offers strong adhesion to aluminium (including powder-coated & anodised), PVC, roof tile, stainless steel, zinc & galvanised coated surfaces, etc. For best performance clean non-porous surfaces with Soudal Cleaner & Degreaser.

APPLICATIONS

A quality, elastic neutral cure silicone suitable for a wide range of applications including sealing for roofing, guttering, flashings, cladding, down pipes, ducting, lap joints, sheet metal including Colorbond®, etc.

- Highly elastic +-25%
- Superior adhesion
- Excellent UV resistant
- Water potable
- Internal & external
- Neutral cure

Options

- 127778 - 300ml Cartridge: Grey
- 127779 - 300ml Cartridge: Translucent

Silirub AQ

DESCRIPTION

HIGH MODULUS acetoxy silicone sealant for elastomeric glass bonding, sealing and the construction of aquaria and terraria. Thick bodied and very easy application. Permanent colour, UV resistant. Stays elastic after curing. Very good adhesion on glass. Chemically inert after curing.

APPLICATIONS

Construction and reparation of glass aquaria and terraria. Chemically inert after curing so all types of aquaria can be constructed without harm to fish. Bonding of glass to glass constructions such as display cases. Glass to glass sheet sealing such as office partitioning.

- High modulus acetoxy cure silicone
- Can be used to seal or bond
- Chemically inert after curing
- 100% silicone with no extension
- Primerless adhesion on most surfaces

Silirub WS+

DESCRIPTION

A high-performance neutral cure silicone that is highly elastic with joint movement allowance of $\pm 50\%$. Silirub WS+ has been developed for weather sealing of expansion joints in the glass and aluminium composite panel façade industries.

APPLICATIONS

Ideal for weatherproof sealing of facade elements for glass curtain walls, for sealing aluminium composite panel joints, all usual building, connection, expansion and dilatation joints. Excellent for double glazing system and weatherproof sealing around structurally glazed window panels.

- Compatible with PVB-film
- UV-resistant
- Meets ASTM C920 elastic $\pm 50\%$
- Permanently elastic after curing
- Very good adhesion on many materials
- Resistant against UV-radiation, rain, frost, wind, ozone and extreme temperatures

Options

102543 - 300ml Cartridge: Clear

Options

128894 - 600ml Foil Pack: Black

153239 - 600ml Foil Pack: Silver grey

Silirub MA

DESCRIPTION

NON-STAINING neutral cure sanitary silicone sealant for the sealing of marble and all other types of natural stone. Contains a powerful anti-fungicidal agent for optimum mould resistance. Will not stain joint surfaces, therefore especially suited for all applications on natural stone. Primerless adhesion on all common construction materials. Highly flexible. Resistant to UV, rain and many chemicals.

APPLICATIONS

Sealing and bonding of marble and other natural stone. Sealing in bathrooms and kitchens and other areas prone to high humidity. Sealing of all types of sanitary ware. Perimeter sealing of window and door frames. Sealing of natural stone cladding facades. Sealing of expansion and movement joints in construction.

- Non-staining on porous stones and marble - ISO 16938-1
- Low modulus neutral cure
- Virtually odourless
- 100% silicone with no extension
- Conforms to ISO 11600 F&G 25LM
- Primerless adhesion on most surfaces
- XS1 Fungicide - conforms to ISO 846
- Food safe
- FDA CFR 21 & 177.2600 (e) & (f)

Options

104528 - 310ml Cartridge: Marble Grey

105100 - 310ml Cartridge: White

106252 - 310ml Cartridge: Black

123597 - 310ml Cartridge: Jasmine

Silirub Cleanroom

DESCRIPTION

Silirub Cleanroom is a high-quality neutral cure, elastic one component silicone sealant with permanent colour, UV-resistant and stays fully elastic after curing. Soudal Silirub Cleanroom Silicone has very good adhesion on many materials, almost no smell, slow skinning time – therefore ideally suited for long joint runs. Silirub Cleanroom has international certification.

APPLICATIONS

Suitable for sealing cool room and refrigeration sandwich panels in hospitals, laboratories and other critical surroundings, sealing in environments where food is handled and stored (food containers and food industry, etc) and where a versatile sanitary sealant is required.

- Resistant to mould
- Resistant to UV
- Permanently flexible
- Very good adhesion to most materials

Options

- 112346 - 300ml Cartridge: White

Silirub PC

DESCRIPTION

Silirub PC is a neutral low modulus silicone sealant specially developed for sealing and waterproofing on polycarbonate.

APPLICATIONS

Sealing between polycarbonate, treated wooden and metal profiles and glass. All usual building joints with high movement. Expansion joints between many different construction materials.

- Very easy to apply
- Colourfast and UV resistant
- Permanent elastic after curing
- Very good adhesion on many materials
- Low odour
- Slow skinning time

Options

- 123600 - 300ml Cartridge: Clear

Silirub® HT-A

DESCRIPTION

HIGH TEMPERATURE resistant acetoxy silicone sealant. Withstands high temperatures of up to 285°C. Highly flexible and weatherproof. Primerless adhesion on many common construction materials (glass, ceramic, porcelain, metals and wood). Resistant to UV, rain, snow, ozone and many chemicals. High movement capability.

APPLICATIONS

For the sealing of elastic joints which require a high temperature resistance; gaskets; hot water installations, pipework, ovens, furnaces and chimney flues. Suitable for external and internal applications.

- Acetoxy cure silicone sealant
- High temperature resistant (up to 285°C)
- External and internal use
- Highly flexible and durable

Options

- 108265 - 300ml Cartridge: Black

Silirub® HT-N

DESCRIPTION

HIGH TEMPERATURE resistant neutral cure silicone sealant. Withstands high temperatures of up to 280°C. Highly flexible and weatherproof. Primerless adhesion on all common construction materials (glass, plastics, masonry substrates, metals and wood). High movement capability. Resistant to UV, rain, snow, ozone and many chemicals.

APPLICATIONS

For the sealing of elastic joints which require a high temperature resistance; gaskets; hot water installations, pipework, ovens, furnaces and chimney flues. Suitable for external and internal applications.

- Neutral cure silicone sealant
- High temperature resistant (up to 280°C)
- External and internal use
- Highly flexible and durable
- Virtually odourless

Options

- 108266 - 300ml Cartridge: Black

Firecement HT

DESCRIPTION

HIGH TEMPERATURE resistant fire cement. Withstands temperature of up to +1,500°C. Excellent adhesion to a wide range of building materials.

APPLICATIONS

For the sealing of ovens, furnaces and chimney flues. Hard setting. Suitable for internal applications

- Ready for use
- Hard setting
- Free of asbestos
- 120 min fire rating
- No fragmentation or cracking after drying

Options

- 108264 - 310ml Cartridge: Black

Pureseal Roof & Gutter

DESCRIPTION

Pureseal Roof & Gutter Silicone is an ultra-premium pure silicone that contains no extenders. Neutral curing so non-corrosive and ideal for a wide range of sealing in demanding applications. Pureseal Roof & Gutter Silicone has very high resistance to UV and is perfect for weather-proofing in harsh Australian conditions, remains permanently elastic and waterproof.

APPLICATIONS

Durable sealing for wide range of applications including – sealing for roofing, gutters, flashing, skylights, cladding, roof tiles, downpipes, PVC, air conditioning ducting, lap joints, metals including Colorbond® steel, aluminium (powdercoated & anodised), zinc, galvanised, etc. Joints in sanitary rooms (on synthetic baths and tubs) and kitchens Sealing between metal components. Connection and expansion joint. Sealing lap joints in roofing materials. To seal horizontal and vertical joints in wall and roof connections

- Corrosion free Pure silicone, contains no extenders
- Very easy to apply
- Colourfast and UV resistant
- Permanent elastic after curing
- Very good adhesion on many materials
- Low modulus
- Corrosion free and low odour
- Highly durable

Options

- 132664 - 300ml Cartridge: Grey
- 132663 - 300ml Cartridge: Clear

Pureseal Kitchen & Bathroom AC

DESCRIPTION

Pureseal Kitchen & Bathroom AC is an ultra-premium pure silicone that contains no extenders. Pureseal Kitchen & Bathroom Silicone AC contains powerful fungicides for long lasting resistance to mould and mildew in demanding sanitary conditions, is very easy to apply and tool in joints, remains permanently elastic and waterproof.

APPLICATIONS

Durable sealing of wide range of application including – sealing joints around bathtubs, vanities, shower screens, sinks and basins, toilets, fibreglass, tiles plumbing fixtures, vitreous enamel, glass, etc. Building and construction joints, especially sanitary and humid places. Top sealing in glazing

- Pure silicone, contains no extenders
- Long open time
- Excellent moisture and mould resistance
- Permanent elastic after curing
- Very good adhesion on many materials
- Colourfast and UV resistant
- Typical acetic smell

Options

- 132665 - 300ml Cartridge: White
- 132666 - 300ml Cartridge: Clear

Pureseal Kitchen & Bathroom NC

DESCRIPTION

Pureseal Kitchen & Bathroom NC is a non-corrosive, neutral cure, ultra-premium pure silicone that contains no extenders. Pureseal Kitchen & Bathroom Silicone NC contains powerful fungicides for long lasting resistance to mould and mildew in demanding sanitary conditions, is very easy to apply and tool in joints, remains permanently elastic and waterproof.

APPLICATIONS

Durable sealing of wide range of application including – sealing joints around bathtubs, vanities, shower screens, sinks and basins, toilets, fibreglass, tiles plumbing fixtures, vitreous enamel, glass, etc. Joints in sanitary rooms (on synthetic baths and tubs) and kitchens

- Pure silicone, contains no extenders
- Long open time
- Excellent moisture and mould resistance contains ZnP (biocide with fungicidal action)
- Permanently elastic after curing
- Very good adhesion on many materials
- Colourfast and UV resistant
- Low modulus
- Corrosion free

Options

- ☐ 132667 - 300ml Cartridge: Clear
- ☐ 132668 - 300ml Cartridge: White

All Weatherflex Gap Filler

DESCRIPTION

A highly flexible, exterior grade, paintable acrylic gap filler that cures to form an extremely durable seal which is waterproof once cured. Ideal for use as a gap filler for high stress applications and for external use due to superior flexibility and high weather resistance.

APPLICATIONS

All Weather Flex has many uses including: sealing around window frames, window sills, skirting boards, cornices, tiles (except showers), staircases, architraves, trims, wall and floorboards and coving. Sealing gaps and cracks in plastered wall and ceilings. Excellent adhesion to multiple surfaces including wood, MDF, particle board, plywood, fibre cement sheet, plasterboard, concrete, masonry including brick and blockwork, cement render, polystyrene foam, tiles, ceramics, aluminium, weatherboard, etc.

- Paintable in 30 mins
- Superior flexibility $\pm 12.5\%$
- Weather resistant
- High crack resistance
- Ideal for weatherboards

Options

129181 - 300ml Cartridge: White

Fill & Paint Gap Filler

DESCRIPTION

A professional quality, paintable, acrylic gap filler that cures to form a durable, flexible seal for general purpose interior / exterior gap filling application. Fill & Paint has a smooth finish with low shrinkage and has good adhesion to most common building materials including wood, MDF, particle board, plywood, fibre cement sheet, plasterboard, concrete, masonry including brick and block work, cement render, polystyrene foam, tiles, ceramics, aluminum.

APPLICATIONS

Fill & Paint has many uses including: sealing around skirting boards, cornices, tiles (except showers), window frames, staircases, architraves, trims, wall & floorboards and coving. Sealing gaps and cracks in plastered wall and ceilings.

- Paintable in 20 mins
- 10% flexibility
- Non slump
- Internal & external
- Water cleanup

Options

122394 - 300ml Cartridge: White

Wet on Wet Gap Filler

DESCRIPTION

A one-component gap filler where immediate painting is required with no waiting time. Due to its unique composition, it minimises the risk for mud cracking or paint crazing, even with difficult highly-filled and covering paints. Immediately paintable with gloss, semi-gloss and low sheen paint. Flat and ceiling paints can be painted after only 10 minutes.

APPLICATIONS

Wet On Wet has many usage including filling and sealing in walls, ceilings, around window frames, skirting boards, cornices, tiles (except showers), staircases, architraves, coving, window sills, plasterboard, trims, floorboard, etc.

- Paintable immediately
- Higher viscosity
- Internal & external
- Water clean up
- Minimizes cracking

Options

135230 - 300ml Cartridge: White

Light Speed Filler

DESCRIPTION

Light Speed Filler is a high quality, rapid drying, lightweight filler which does not shrink and is used for the filling and sealing of pinholes, drill holes, gaps and cracks in walls and ceilings made from timber, plaster, drywall panels, concrete, brick and other porous substrates.

APPLICATIONS

Suitable to use on filling holes and cracks in plaster, concrete, drywall panels. Filling and repair of gap and cracks, drill holes, screw holes in wall and ceilings. Shrink-free finishing of seams on decorative profiles.

- Ready mixed
- Light weight
- Does not shrink
- Easy to clean
- Rapid drying
- Light weight

Options

- ☐ 132673 - 250ml Tub: White
- ☐ 132672 - 900ml Tub: White

Universal Bog

DESCRIPTION

Universal Bog is a heavy duty, high quality two-part repair filler with excellent adhesion on a wide range of surfaces for internal and external use. Universal Bog will not shrink or rot and is fully waterproof and has good gap filling properties. Fast setting, can be sanded after 20mins and once cured it can be cut, trimmed, chiseled, painted, screwed, drilled and nailed.

APPLICATIONS

Ideal to repair gaps, cracks, holes, dents or replacing damaged or missing sections of timber, architraves, cavities, concrete & masonry, window frames, metal, aluminum, most plastics (pre-test), fiberglass, building sheets, tiles, etc.

- Smooth and easy to apply
- None shrink, slump / sag
- Will not rot and remains waterproof
- Repairs gaps, cracks, holes and dents
- Wide range of application on a variety of surfaces
- Sandable

Options

- ☐ 132560 - 750g Tub: Ivory
- ☐ 132561 - 1.5kg Tub: Ivory
- ☐ 121174 - 50g Tube: Hardener

Contractors 101 Gap Filler

DESCRIPTION

A flexible and paintable acrylic gap filler, ideal for sealing gaps, cracks and joints with movement of $\pm 10\%$. Has a smooth finish and cleans up with water. Suitable for interior and exterior, though protect from moisture when used external. Over paintable after product skins approx. 60 mins.

APPLICATIONS

Suitable for sealing around window frames, window sills, skirting boards, cornices, walls and floorboards for internal and external applications. Offers strong adhesion to most common building materials including wood, MDF, particle board, plywood, fibre cement sheet, plasterboard, concrete, masonry including brick and block work, cement render, tiles, ceramics, aluminium.

- Very easy to apply
- Colourfast and UV resistant
- Permanently elastic after curing

Options

- 144611 - 280ml Cartridge: White

Acryl Paintable Sealant

DESCRIPTION

Acryl Paintable Sealant is a high quality, one-component, acrylic joint sealant for interior applications for faster paintability. Suitable for filling cracks in concrete and plasters. Joints on window sills, between plinths and walls, and masonry.

APPLICATIONS

Acryl Paintable Sealant has many usage including filling and sealing cracks in concrete and plaster, connection joints, and joints on window sills, etc

- Very easy to apply
- Colourfast and waterproof after curing
- Paintable in 10 mins
- Very good adhesion on many porous surfaces and aluminium

Options

- 124731 - 80ml Tube: White

Repair Express Plaster

DESCRIPTION

HIGH SPEED acrylic polymer based, lightweight repair plaster. For an easy and quick reparation or filling in walls & ceiling e.g. cracks, screw holes etc. Can be applied by trowel or gun. Sandable and over-paintable once dried. Non-shrinking.

APPLICATIONS

For the filling and repair of cracks and small holes in walls and ceilings - plasterboard, concrete, stone, plasterwork, masonry and decorative plaster. For the filling of static joints and cracks in walls and ceilings.

- Acrylic polymer high speed repair plaster
- Smooth finish
- Very fast curing
- Non-shrinking
- Can be sanded after curing
- Paintable
- Very good adhesion on many porous materials

Options

- ☐ 122525 - 290ml Cartridge: White
- ☐ 152306 - 900ml Tub: White

Repair Express Cement

DESCRIPTION

HIGH SPEED acrylic polymer based, textured repair cement. For easy and quick reparation or filling of joints and cracks in concrete. Can be applied by trowel or gun. Sandable and over-paintable once dried. Can be used for internal and external applications.

APPLICATIONS

For repairing holes and cracks in concrete and cement. For repairing joints in masonry. Repairing of damages in concrete stairs etc.

- Acrylic polymer high speed repair cement
- Very fast curing
- Excellent adhesion on many mineral surfaces
- Can be used internally and externally
- Textured finish
- Paintable

Options

- ☐ 125786 - 290ml Cartridge: Grey
- ☐ 152305 - 900ml Tub: Grey
- ☐ 128000 - 290ml Cartridge: Beige
- ☐ 152307 - 900ml Tub: Beige

Timber & Parquet Sealant

DESCRIPTION

A high-quality, plasto-elastic one-component sealant based on acrylic dispersion that cures to form an extremely durable seal. Once cured can be sanded along with the timber and can be coated or varnished to match the gloss level of the timber flooring. This ensures the sealant is almost unseen.

APPLICATIONS

Filling of joints with movements up to 15%. Ideal for filling sealant for joints in timber or laminate floors, connection joints between parquet floors, skirting boards and walls; also suitable for cracks in wooden floors.

- Remains flexible
- Can be coated / varnished
- Ready to use
- Water resistant after curing
- Solvent free
- Water clean up

Butyrub

DESCRIPTION

POLYBUTYLENE based, semi-setting elasto-plastic sealant. Very easy to apply. Forms an elastic and tight skin. Can be painted over after 24 hours. Very good adhesion on many building surfaces. UV and weather resistant. Good resistance against chemicals.

APPLICATIONS

Sealing of low movement joints with limited movement up to 5%. Sealant for joints in masonry, door and window frames, windowsills. Mounting of single layer glass in wooden, concrete and steel frames (e.g. greenhouses). Sealant for joints in car-bodies, containers and caravans. Lap sealant for sheet metal roofing.

- Polybutylene sealant
- Semi-setting
- Paintable with most coatings
- Weatherproof
- Forms an elastic skin
- UV resistant
- Excellent resistant to many chemicals

Options

- 101478 - 300ml Cartridge: Black
- 102572 - 300ml Cartridge: White

Duct Sealant

DESCRIPTION

Duct Sealant is a tough and flexible sealant to prevent air leakage in low, medium and high velocity ducting systems.

APPLICATIONS

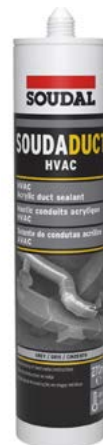

All types of HVAC duct systems including sheet metal, duct board and flexible ducts. Sealing of seams, spigot and flange joints and metal fabrications. Joints with movements up to 15%.

- Remains flexible to 15%
- Paintable
- Very easy to apply
- Low odour
- Solvent free
- Fire reaction Class E

Options

- 135254 - 4kg Tub: Grey

Soudaduct HVAC

DESCRIPTION

Soudaduct HVAC is a high-quality, plastoelastic, solvent free HVAC ducting sealant for all types of metal ducts

APPLICATIONS

Sealing of joints, seams and overlaps in HVAC systems. Joints with movements up to 12.5%.

- Very easy to apply
- Does not contain solvents
- Virtually odourless
- Colourfast and waterproof after curing
- Excellent adhesion on aluminum
- Good adhesion on anodised aluminum

Options

- 146444 - 270ml Cartridge: Grey

Soudafoam FR HY

DESCRIPTION

Soudafoam FR is a one-component, fire retarding, self expanding, ready to use PU foam, which contains propellants that are not harmful for the ozone layer. Soudafoam FR is a PU foam with fire retardant characteristics according to the Aust Standard AS1530.4-2005 and European standard EN 1366-4.

APPLICATIONS

- Installation of fireproof doors and windows
- Sealing of fire retardant joints in walls and ceiling
- As part of the "Soudal Fire Range" assortment for penetration seals and joints
- Sealing of all openings in roof constructions
- Apply of an acoustic baffle
- All foam applications in static joints
- Hand Held and Gun Grade versions

Options

- 169456 - 750ml Canister (Straw): Red
- 169466 - 750ml Canister (Gun Grade): Red

Soudaseal FR

DESCRIPTION

Soudaseal FR is a high quality, fire retarding, single component joint sealant with high adhesive strength and excellent elasticity. For use in high movement joints in construction, automotive, marine and aerospace areas where a tough flexible rubber is required with excellent fire retardant characteristics. Once cured forms a strong, flexible, waterproof seal and bonds to the widest range of substrates. Fire retardant up to 240 min.

APPLICATIONS

- Fire retardant expansion and connection
- joints in the construction industry.
- Sealing of fire-retardant joints in prefab buildings and skyscrapers.
- Flexible connections in automotive applications.
- As part of the 'Soudal Fire Range'
- assortment for penetration seals and joints.

Options

- 137450 - 290ml Cartridge: Grey
- 131480 - 600ml Foil Pack: Grey

Firecryl FR

DESCRIPTION

FIRE RATED intumescent acrylic sealant and filler. Totally solvent, silicone and isocyanate free. Colourfast and waterproof after curing. Can be painted over after curing. Odourless. Primerless adhesion on most construction materials. Conforms to all international standards including CE marking.

APPLICATIONS

For use in internal passive fire protection systems as a joint sealant or filler; installation of fire retardant window and door frames, fire retardant connection joints, penetration seals, internal garages.

- Fire-resistant and smoke-tight indoor applications.
- As part of the 'Soudal Fire Range' assortment for penetration seals and joints.
- Sealing of fire retardant joints in walls and ceiling.
- Fire-retardant filling of cracks in concrete and plasterwork.
- Applications where the sealant needs to be overpainted with water based paints and varnishes.

Options

- 131479 - 310ml Cartridge: Grey
- 131478 - 600ml Foil Pack: Grey

Flexible Insulation Expanding Foam

DESCRIPTION

Flexible Insulation Expanding Foam is a one-component, self-expanding, ready to use polyurethane foam with elastic properties, which allow the foam to follow the movement of the joint and keep its insulation properties for many years. It has been fitted with the unique patented Genius Gun - adaptor system for maximum comfort during application.

APPLICATIONS

Insulation and filling of expansion joints, filling of joints between wall panels, filling of openings between window frames and the surrounding constructions, filling wall cavities, holes, pipe penetrations. Perfect for improving thermal and acoustic insulation and eliminating drafts or thermal bridges. Does not react to most building materials including electric cables. Can be cut, sanded, painted, plastered or covered with sealant when cured.

- 3 times more flexible than standard PU foam
- Airtight (see IFT-report)
- Water Vapour Open
- Excellent stability (no shrinkage or postexpansion)
- High filling capacity
- Good adhesion on all surfaces
- High insulation value, thermal and acoustic

Options

- 130425 - 750ml Genius Gun: Blue

Gap Filling Expanding Foam

DESCRIPTION

Specially designed patented trigger mechanism, ensuring precise dosage and removing the need for an additional gun. It is easy to use and can be operated with one hand. Reusable up to 6 weeks after the first application. The expansion of the foam makes it the ideal gap filler. Sound reducing, extremely light, chemically inert once cured. Does not shrink or expand once cured.

APPLICATIONS

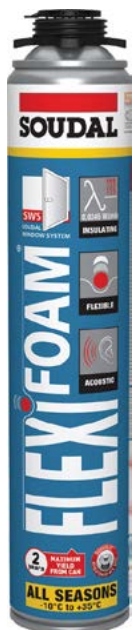

Ideal for quick and easy filling of gaps, joints, holes, pipe penetrations. Perfect for improving thermal and acoustic insulation and eliminating drafts or thermal bridges. Does not affect building materials including electrical cables. Can be cut, sanded, painted, plastered or covered with sealant when cured. Cover in order to protect from UV light for longer life. Internal and external use.

- Excellent stability
- High filling capacity
- Good adhesion on all surfaces
- High insulation value, thermal and acoustic
- Very good bonding properties.

Options

- 132272 - 500ml Genius Gun: Champagne
- 130373 - 750ml Genius Gun: Champagne

Flexifoam Gun

DESCRIPTION

Flexifoam Gun is a one-component, selfexpanding, ready to use polyurethane foam with elastic properties, which allow the foam to follow the movement of the joint and keep its insulation properties for many years. Because of the Duravalve, the optimal yield remains over the entire shelf life, even when stored or transported lying down. Flexifoam Gun is filled with HCFC- and CFC-free propellants which are not harmful for the ozon layer.

APPLICATIONS

Insulation and filling of expansion joints, filling of joints between wall panels, filling of openings between window frames and the surrounding constructions, filling wall cavities, holes, pipe penetrations. Perfect for improving thermal and acoustic insulation and eliminating drafts or thermal bridges. Does not react to most building materials including electric cables. Can be cut, sanded, painted, plastered or covered with sealant when cured.

- 3 times more flexible than standard PU foam
- Airtight (see IFT-report)
- Water Vapour Open
- Excellent stability (no shrinkage or postexpansion)
- High filling capacity
- Good adhesion on all surfaces
- High insulation value, thermal and acoustic

Options

- 117472 - 750ml Gun Grade: Blue

Gap Filling Expanding Foam - Straw

DESCRIPTION

A PU-based, one-component, self-expanding, ready to use PU-foam, which contains HCFC- and CFC-free propellants that are not harmful for the ozone layer.

APPLICATIONS

Ideal for installing of window and door frames, filling of cavities, sealing of all openings in roof constructions, apply of an acoustic baffle and improving thermal isolation in cooling systems.

- Excellent stability (no shrinkage or postexpansion)
- High filling capacity
- Good adhesion on all surfaces (except PE, PP and PTFE)
- High insulation value, thermal and acoustic
- Very good bonding properties. Freon free (not harmless to ozone layer and greenhouse effect)

Options

- 153470 - 500ml Can: Champagne
- 127968 - 750ml Can: Champagne

Gap Filling Expanding Foam - Gun Grade

DESCRIPTION

A PU-based, one-component, self-expanding, ready to use polyurethane foam, which contains HCFC- and CFC-free propellants that are not harmful for the ozone layer and where the canister is provided with a thread so it can be used on a gun. Because of the Duravalve, the optimal yield remains over the entire shelf life, even when stored or transported lying down.

APPLICATIONS

Ideal for installing of window and door frames. Filling of cavities. Sealing of all openings in roof constructions. Apply of an acoustic baffle. Improving thermal isolation in cooling systems.

- Excellent stability
- High filling capacity
- Good adhesion on all surfaces
- High insulation value, thermal and acoustic
- Very good bonding properties

Options

- 130278 - 750ml Can: Champagne

Soudafoam SMX

DESCRIPTION

Unlike classic expanding foams, SMX® Foam is entirely based on new technology. Soudafoam SMX® is a ready to use one component self expanding and 100% isocyanate free foam with a high filling capacity, high insulation value, thermal and acoustic properties. Good adhesion on all surfaces (except PE, PP and PTFE).

APPLICATIONS

Sealing horizontal and vertical joints in wall and roof connections. Sealing of all openings in roof constructions. Filling of cavities. Apply of a sound absorbing layer. Apply of an acoustic baffle. Improving thermal isolation in cooling systems.

- Excellent stability
- High filling capacity
- Good adhesion on all surfaces
- High insulation value, thermal and acoustic
- Very good bonding properties

Options

- 113839 - 500ml Can: Off White

SOUDAL BOND *EASY*

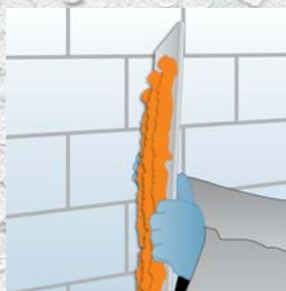

Makes life *EASY*

What is it?

A PU Foam Adhesive.

What does it do?

Replaces traditional methods of fixing panels, insulation & drywall.

Soudal's UNIQUE Delivery Systems:

Soudabond Easy

DESCRIPTION

POLYURETHANE foam based, single component, construction adhesive. Quick and easy to use – no mixing required. Replaces traditional powder based adhesives. Used for the bonding of many building materials such as insulation panels, plasterboard and light weight building blocks in non-load bearing applications. Lightweight and easy to transport. Available in Hand Held MEGA ADAPTOR, Genius Gun® MAX and Gun Grade with Dura Valve versions.

APPLICATIONS

Clean, efficient and economical bonding of many types of Insulation panels - polyurethane, phenol, resin foam. Can also be used for bonding polystyrene. Bonding of gypsum plasterboard in dry lining applications. Can be used for bonding non-load bearing walls. Bonds many other building materials such as brick, stone, aluminium, ceramics, MDF, steel, cork, wood and chipboard.

- Single component PU adhesive
- Up to 30% quicker than traditional methods
- Gap-filling capabilities
- No mixing required
- Porous and non-porous materials
- Hand Held, Gun Grade and Genius Gun® MAX versions

Options

- 121734 - 750ml Adhesive Gun (Screw Top): Pink
- 130426 - 750ml Genius Gun®: Pink

Soudabond Subfloor

DESCRIPTION

A high strength, fast curing PU adhesive foam that collapses to a gel adhesive immediately after application. The product meets ASTM D3498, can be applied in temperatures as low as -17 °C, sticks to dry, wet or frozen timber and can help prevent floors from squeaking

APPLICATIONS

Soudabond Subfloor will bond to most common building materials such as concrete, masonry, metals, plywood, OSB, treated timber, etc., making it the perfect product to be used as a subfloor adhesive and many more bonding applications. Bonding of timber subfloors to timber or metal joists.

- Stick to wet and frozen timber
- 1 can = 12 cartridges of Construction Adhesives
- 100% solvent free
- No mixing
- For interior & exterior use
- Saves application time by 75%

Options

- 137642 - 836ml Adhesive Gun (Screw Top): Brown

NEW

Soudabond Drywall

DESCRIPTION

Soudabond Drywall is a ready-to-use, single component, high strength, fast curing polyurethane adhesive that is semi-collapsible after dispensing. It is used for clean, efficient and economical permanent drywall bonding in building and construction. Soudabond Drywall does not contain CFC's or HCFC's.

APPLICATIONS

Clean, efficient and economical permanent bonding of all common types of drywall panels, plus other construction adhesive applications.

- Saves application time (up to 25%) and money over the use of traditional adhesives.
- Resistant to a variety of solvents, paints and chemicals.
- Water resistant (not watertight).
- Limited post expansion for fast and precise installation of drywall.
- Excellent initial bond
- Economical in use due to precise application.
- Substantial space and weight savings compared to conventional PU adhesives, bonding mortars, etc.

Options

- 153577 - 750ml Adhesive Gun (Screw Top): Champagne

SOUDABOND MT

Soudabond MT

DESCRIPTION

Soudabond MT is a ready-to-use, waterproof and flexible adhesive paste. Soudabond MT is ideal for waterproof and flexible bonding of floor and wall tiles (CE approved D2TE according to EN 12004). The adhesive has a high initial tack and can be used on slightly moist substrates.

APPLICATIONS

Waterproof and flexible bonding of ceramic tiles, mosaic tiles, stone strips and natural stone. As the adhesive meets class EN 12004 D2TE it is perfectly suited for applications in humid environments such as bathrooms, kitchens, showers and other humid rooms. Suitable for tiling onto porous substrates such as: fibre cement sheet, render, screed, concrete, plasterboard and also suitable for tiling onto Soudagum LM Waterproofing Membrane.

- Ready to use
- Good initial bonding, no sagging
- Suitable for natural stone
- Moisture and water resistant
- Long open time
- Class D2TE according to EN 12004

Options

- 131338 - 15kg Tub: White

CONSTRUCTION ADHESIVE

EVOLUTION...

FIBRE RE-INFORCED
for increased end strength

SOUDAL

Strong As Nails Fix It

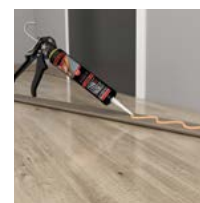

DESCRIPTION

Solvent based high performance, gap filling construction adhesive. High bond strength. Suitable for vertical and horizontal bonding applications, both inside and outside. Does not attack Polystyrene.

APPLICATIONS

Versatile adhesive, finding utility in assembly bonding, renovation tasks, construction applications, and the bonding of cable trays and panels.

- Multi-purpose
- High performance
- High bond strength
- Easy to gun
- Waterproof packaging
- Excellent adhesion to most building materials

Options

- 144898 - 350g Cartridge: Beige
- 144904 - 20x 350g Tub: Beige

Strong As Nails Super Grab

DESCRIPTION

Solvent free, high performance, premium grade gap filling construction adhesive. High initial grab – up to 140kg/m² making it ideal for bonding heavy materials without slump. Repositionable for up to 30mins. Water-based so low odour and low toxicity (VOC).

APPLICATIONS

Excellent adhesion on typical building surfaces, and suitable for fixing materials like wood, synthetics, stone, and metal to surfaces such as concrete, stone, plasterboard, wood, and chipboard. Versatile for bonding panel work, trays, decorative materials, as well as cable trays and panels.

- High performance
- Super initial grab - up to 140 kg/m²
- Cartridges made from recycled materials
- Ideally for bonding heavy materials
- High bond strength
- Very low VOC, meets GBCA requirements
- Waterproof packaging
- Excellent adhesion to most building materials

Options

- 144903 - 350g Cartridge: Beige
- 144902 - 20x 350g Tub: Beige

SMX®-20 Plus Adhesive

DESCRIPTION

SMX®-20 Plus is a flexible adhesive based on SMX® Technology. Suitable for bonding many types of timber floors onto indoor substrates. It contains no water or solvent - minimising the risk of deforming the timber floor to a minimum. Once fully cured, it forms an elastic and non-shrinkable adhesive layer, which is resistant to moisture and heat. SMX®-20 Plus has an excellent adhesion to most common substrate used in construction industry.

APPLICATIONS

Suitable for use on porous and non-porous substrates such as mosaic, anhydrite, concrete, screeds, wood, chipboard, existing ceramic tiles, including floors with under floor heating.

- Fast curing
- Walk on after 8 hr, sand after 24 hrs
- Ready to use, no mixing required
- Remains permanently elastic
- Free of isocyanates, solvents & water
- 18 KG = 18 - 20m²
- 16 KG = 16 m²
- 600 ML = 1 m²

Options

- 130243 - 600ml Foil Pack (Sausage): Light brown
- 132261 - 16kg Tub: Light brown
- 132271 - 18kg Tub (3x 6kg Foil Bags): Light brown

SMX®-30 Plus Adhesive (2-in-1)

DESCRIPTION

SMX®-30 Plus is a 2:1 flexible adhesive and moisture barrier that is solvent and water-free based on SMX® Technology. Once fully cured, an elastic and non-shrinking adhesive layer is formed, which is resistant to moisture and heat. SMX®-30 Plus does not contain water or solvents, minimising the risk of deforming the timber to a minimum. Suitable for subfloors with a residual moisture content up to 6% or 95% relative humidity without the use of a moisture barrier due to the unique sealing capabilities.

APPLICATIONS

Suitable for indoor bonding of all types of wooden floors such as solid, stab, pre-finished, and on-end parquet, wood-planks up to 18cm wide, wood- block and laminates. Suitable for use on porous / non-porous substrates such as mosaic, concrete, screeds, wood, chipboard, existing ceramic tiles, including floors with underfloor heating. Extremely suitable for bonding moisture sensitive wood onto moderately porous surfaces.

- Rapid cure & build up of final strength
- Walk on after 2 hr, sand after 12 hrs
- Forms stable peaks once applied
- High final bond strength
- Free of isocyanates, solvents & water
- 18 KG = 18 - 20m²
- 600 ML = 1 m²

Options

- 120625 - 600ml Foil Pack (Sausage): Brown
- 120626 - 18kg Tub (3x 6kg Foil Bags): Brown

LVT Premium Adhesive

DESCRIPTION

PREMIUM QUALITY, ready to use, solvent-free dispersion adhesive for bonding of elastic flooring materials to flat, absorbent surfaces.

APPLICATIONS

Used for the bonding of flexible flooring materials such as LVT (luxury vinyl tiles) flooring, PVC tiles and cushion vinyl. Also suitable for rubber floorings, fibre bonded and carpet tiles, textile carpets and linoleum onto porous, flat surfaces such as concrete (screed), levelling compounds and timber.

- Ready to use solvent-free dispersion adhesive
- High initial tack
- Short evaporation time, approx. 10 minutes
- Long open time, approx. 30 minutes
- Very high final strength
- Can be walked over immediately after application
- Heat resistant, can be used with under floor heating
- EC-1 PLUS label: very low emissions
- Complies with EN14259: Adhesives for floor coverings

Options

134895 - 13kg Bucket: Light Beige

High Tack Stud Adhesive

DESCRIPTION

High strength, high tack adhesive suitable for adhering of internal plasterboard and fibre cement, wallboards, timber and steel frames for wall and ceiling installations. A low VOC adhesive that surpasses all requirements of the Australian Standard AS2753-1985.

APPLICATIONS

Ideal for a bonding of drywall panels, internal plasterboard panels and fiber cement wallboard to timber and approved metal studs (Truecore, Rondo, Knauf have been tested). Also ideal for bonding Wall and Ceiling applications and bonding of decorative elements, cornices, skirting boards, etc.

- High bond strength
- Initial grab >140kg/m²
- Longer open time
- Timber & metal stud
- Zero slump
- Low VOC

Options

- 144655 - 600ml Foil Pack: Blue
- 144656 - 5.2kg Tub: Blue

Water Resistant PVA Wood Glue

DESCRIPTION

A one component, humidity resistant, interior and exterior PVA wood adhesive that fulfills the requirements for long term high bond strength. Water resistant to class D3 (EN204).

APPLICATIONS

Suitable for bonding of wood products, MDF, particle board, formica, veneers, oak and tropical hardwood.

- Conforms to DIN EN 204 grade D3
- Odourless
- Fast drying
- High bond strength

Options

- ☐ 129183 - 250ml Bottle: White
- ☐ 129184 - 500ml Bottle: White
- ☐ 117245 - 1L Bottle: White
- ☐ 116946 - 5L Jerry Can: White

Waterproof PU Adhesive

DESCRIPTION

Waterproof PU Adhesive which foams up slightly during curing to fill gaps. Extremely high strength, rigid once cured. It will set hard in about 3 hours and even bonds to wet surfaces. Excellent resistance to solvents and chemicals.

APPLICATIONS

Waterproof PU Adhesive can be used to bond most types of wood (soft, hard) laminate, polystyrene foam, PU foam and glass wool to porous surfaces. Also adheres to metal, stone, ceramics, porcelain, glass, concrete, brick, masonry and most plastics (Not PE, PP). Typical areas of use include window and door frames, wood jointing and construction, staircases, ladders, boat building, general household repair, hobby use and much, much more. Interior applications with frequent long-term exposure to running or condensed water. Exterior applications with exposure to weather influences. Manufacturing of door and window-frames that need to meet class D4 according to EN204. Substrates should be clamped during 180 minutes for best adhesive performance.

- Easy application
- High bond strength
- UV resistant
- Transparent when dry
- Resistant to high temperature

Options

- ☐ 130318 - 750g Bottle: Light Brown

110 LQ Contact Adhesive

DESCRIPTION

Ready to use brush/trowel grade, solvented contact adhesive based on polychloroprene rubber (neoprene). It contains 22% solid content. 110LQ Contact Adhesive has great holding strength and does not require clamping to hold the materials.

APPLICATIONS

110 LQ Contact Adhesive is suitable for bonding different materials like metals, rubber, leather, cork, plastic, wood, felt, etc., on various type of surfaces.

- High initial tack
- Fast build-up of end strength
- High adhesive strength
- Moisture resistant
- Heat resistance up to 110° C

Options

- 134658 - 500ml Tin: Amber
- 131189 - 1L Tin: Amber
- 131190 - 5L Tin: Amber

Contact Adhesive Gel

DESCRIPTION

A universal, toluene free, solvented ready to use tixotropic contact adhesive based upon rubber and synthetic resins.

APPLICATIONS

Bonding of many materials such as rubber, leather, cork, plastic, felt, etc. on various types of substrates or among themselves. Bonding synthetic decoration panels and worktops in wood, metal or board.

- Gel neoprene adhesive
- Solvent based
- Fast drying
- High strength adhesive
- Moisture resistant

Options

- 104808 - 50ml Blister Pack Tube: Amber

Contact Adhesive Liquid

DESCRIPTION

LIQUID solvent based neoprene contact adhesive. Universal, toluene free formulation, based upon rubber and synthetic resins. Available in a range of formats, the ready to use adhesive is easy to apply and fast curing. High final bond strength. Damp resistant.

APPLICATIONS

For the bonding of many materials, such as rubber, leather, cork, plastic, felt, etc. onto various surfaces or to the same material. Perfect for bonding synthetic decoration panels and worktops on wood, metal or board.

- Liquid neoprene adhesive
- Solvent based
- Fast drying
- High adhesive strength
- Moisture resistant

Options

- 100033 - 50ml Blister Pack Tube: Yellow

Contact Adhesive Spray

DESCRIPTION

Sprayable contact adhesive, for the universal bonding of most materials. Ideal for bonding carpet and floor coverings. The ready to use formulation can achieve both permanent or temporary adhesion.

APPLICATIONS

Used for the bonding of paper, cardboard, photos and posters, textile, felt, cork on cork, wood, concrete, glass and metals. Should not be used on PE/PP/PS (polystyrene) and mild PVC.

- Contact adhesive aerosol spray
- Use for permanent or temporary bonding
- High adhesion
- Moisture resistant
- Suitable for most materials

Options

- 132675 - 300ml Aerosol: Transparent

Contact Adhesive Transparent

DESCRIPTION

TRANSPARENT, ready to use, solvented contact adhesive. The universal, vinylacetate polymer based formulation is perfect for when an invisible bond is required.

APPLICATIONS

Suitable for bonding of plastics, chipboard, particle board, rubber, leather, linoleum, cork etc. to each other and to timber, concrete, metals, etc.

- Transparent contact adhesive
- Solvent based
- Fast drying
- High adhesive strength
- Moisture resistant

Options

- 131972 - 50ml Tube: Transparent

142 SP Contact Adhesive

DESCRIPTION

Ready to use, toluene free, pink, sprayable contact adhesive based on polychloroprene (Neoprene®)

APPLICATIONS

Used in two-sided adhesions on various materials, wood and stratified decorative coveringpanels (Formica®, Resopal®,...), veneer, stairsteps and nosings, PVCplinth, leather, cork, textile, with each other for wood, wood derivatives, stone, concrete, plaster, metal and other smooth, non-porous surfaces. Meant for all adhesions where a fast bonding is required, for adhesions of two non-porous materials. Only for interior use

- Ready to use, on a sprayable viscosity
- Immediately fixed
- Fast strength build-up
- Resistant against high temperatures
- Moisture resistant
- Toluene free

Options

- 109777 - 20L Tin: Rose

145 SPT Contact Adhesive

DESCRIPTION

Ready to use, toluene free, sprayable contact adhesive based on polychloroprene (Neoprene®)

APPLICATIONS

Used in two-sided adhesions on various materials, wood and stratified decorative coveringpanels (Formica®, Resopal®,...), veneer, stairsteps and nosings, PVCplinth, leather, cork, textile, with each other for wood, wood derivatives, stone, concrete, plaster, metal and other smooth, non-porous surfaces. Meant for all adhesions where a fast bonding is required, for adhesions of two non-porous materials. Only for interior use

- Ready to use, on a sprayable viscosity
- Immediately fixed
- Fast strength build-up.
- Moisture resistant.
- Resistant against high temperatures
- Toluene free

Options

- 128677 - 20L Tin: Clear

Epofix 82A

DESCRIPTION

High performance and very fast setting 2 part epoxy adhesive with maximum strength. Bonds a variety of surfaces and quick setting in 10 minutes. Once cured it will form a durable rigid bond.

APPLICATIONS

Epofix is suitable for bonding a wide variety of materials including porcelain, metals, wood, ceramic, glass, plastics etc.

- Easy to use dual syringe
- Fast curing
- Fast strength build-up
- 2 component adhesive
- High strength
- Re-useable

Options

- 100071 - 290ml Cartridge: Clear

SMX Ultra Repair Adhesive

DESCRIPTION

Single component, transparent, SMX Polymer based repair adhesive. Remains permanently flexible after curing. Solvent free and odourless formulation.

APPLICATIONS

For the gluing of (imitation) leather, textile, metal, ABS, rubber, cork, plastic, felt, and many hard and soft plastics, etc. Bonding of transparent materials such as glass, PC, Plexiglas and PMMA. Repair of porcelain and pottery.

- SMX hybrid polymer
- Extremely powerful
- Fast setting
- Adheres to most materials
- Indoor and outdoor applications

Options

- 134478 - 20ml Tube: Clear

Purocol Express

DESCRIPTION

POLYURETHANE gun applied, thixotropic construction adhesive. Professional quality. Transparent. Extra fast curing. Gap filling characteristics, suitable for uneven surfaces. Waterproof. Conforms to DIN EN 204 grade D4. Solvent free. Five minute open time.

APPLICATIONS

Manufacturing of door and window frames that need to meet class D4 according to EN 204. Bonding of wooden construction elements. Bonding of insulation materials (including polystyrene). Can also be used on various porous and non-porous substrates such as concrete, bricks and other common materials in the building industry. General joinery of wooden materials.

- Gun applied thixotropic PU adhesive
- Conforms to DIN EN 204 grade D4
- Foaming action to fill gaps
- Transparent
- 5 minute open time
- Pressing time - 1 hour
- Extra fast

Options

- 112524 - 310ml Cartridge: Transparent

2C Adhesive Kits

DESCRIPTION

Cyanoacrylate based high viscosity adhesive with aerosol activator. Particularly useful for production lines and UPVC window trim. Activator reduces blooming and odour.

APPLICATIONS

Used in the furniture, timber, kitchen and plastics industries where its instant bonding properties dramatically reduce assembly times for mitre joints when compared to conventional wood adhesives. The product is also suitable for instant bonding of MDF, rubber, PVCu, metals and most plastics.

- 2 part adhesive system
- High bond strength
- Non yellowing
- High viscosity adhesive
- For porous and non porous substrates
- Ideal for vertical surfaces

Options

- ☐ 135623 - 50g/200ml: Transparent
- ☐ 135624 - 100g/400ml: Transparent

Cyanofix 84A Liquid Superglue

DESCRIPTION

A superfast solvent free instant superglue that is set in 1 minute. Easy to control bottle and dries clear.

APPLICATIONS

Suitable for the fast bonding of e.g. plastics, metal, timber, porcelain, cork, leather, ceramics, cardboard, paper and rubber.

- High bond strength
- Bonds to wide range of materials
- Fast cure
- Solvent-free

Options

- ☐ 100072 - 3g Tube: Transparent
- ☐ 101125 - 20g Tube: Transparent

Cyanofix Gel Superglue

DESCRIPTION

Cyano GEL is a non dripping gel type adhesive for the fast bonding of materials which are not exactly matching. The adhesive has a longer open time than regular cyano acrylates.

APPLICATIONS

Suitable for bonding of e.g. plastics, metal, timber, porcelain, cork, leather, ceramics, cardboard, paper and rubber.

- High adhesive strength
- Bonds to wide range of materials
- Fast cure
- Single component system

Options

- ☐ 116390 - 3g Tube: Transparent

FIX ALL® Ultra Strong Mounting Tape

DESCRIPTION

Ultra-strong double-sided mounting tape. A quick and easy solution for permanently mounting and bonding on a wide range of materials. Highly durable and long-lasting adhesion to the surface, providing an ultra-strong bond inside and outside.

APPLICATIONS

Suitable for a wide range of bonding applications, including the mounting of fire detectors, coat racks, photo frames and much more. Can be used both indoor and outdoor. Can be used in bathroom or damp environments.

- Ultra-strong mounting tape
- Quick and easy bonding
- High adhesive strength
- Easy peel liner
- Indoor and outdoor use
- UV and moisture resistant

Options

- 155515 - Roll: 1.5m x 19mm: White

FIX ALL® 100% Clear Mounting Tape

DESCRIPTION

Transparent double-sided mounting tape. A quick and easy solution for permanently mounting and bonding on a wide range of materials. Highly durable and long-lasting adhesion to the surface, providing a strong bond inside and outside.

APPLICATIONS

Bonding of transparent materials such as glass and plexiglass, as well as other objects and materials. Can be used both indoor and outdoor. Can be used in bathroom or damp environments.

- 100% Clear mounting tape
- Ultra thin
- Permanently clear
- High adhesive strength
- Indoor and outdoor use
- UV and moisture resistant

Options

- 155514 - Roll: 1.5m x 19mm: Clear

Soudagum Hydro

DESCRIPTION

HYBRID POLYMER, solvent free waterproof protective coating suitable for a broad range of applications from roof & gutter repair to general sealing and protection of interior and exterior joints, gaps and cracks. The single-component liquid membrane is suitable for both horizontal and vertical surfaces. Can be reinforced with a fleece lining (110g/m²) between two layers of the liquid coating. Available in 5kg and 10kg buckets, or a 1kg repair kit.

APPLICATIONS

For both indoor and outdoor applications where a protective waterproof coating is required. Suitable for the waterproofing of skylights, dome lights, pipe collars and wall breakthroughs. Waterproofing and repair of roofs and metal/plastic guttering. Repair and renovation of rooftops (pans, slats, zinc), roof edges and chimney flashings. Treatment of lead and zinc corrosion. For protection and renovation of wooden constructions, including fence posts to protect against exposure to moisture.

- Ready to use, single component waterproof coating
- Solvent and isocyanate free
- Excellent workability
- Can be applied in 2 layers
- Excellent adhesion on most substrates
- Good UV and weather resistance

Options

- 134553 - 1kg Repair Kit: Grey
- 131634 - 5kg Tub: Grey
- 131632 - 10kg Tub: Grey

Soudagum LM

DESCRIPTION

A polymer dispersion with mineral fillers, a plasticizer, a flow controlling agent and preservation additives. It is a fast-drying, ready to use, solvent free, thixotropic paste. Cures into a flexible membrane once dried.

APPLICATIONS

Liquid waterproofing membrane for internal wet areas such as bathrooms, showers and laundries over concrete, cement renders, gypsum boards. Flexible and resistant membrane for the waterproofing of indoor floor and wall surfaces of wet rooms with temporary standing water, which will be covered by ceramic tiles. To be applied before the installation of ceramic tiles.

- Class III membrane
- Re-coat in 4 hrs
- Tile over in 12 hrs
- Ideal for trade /DIY
- Permanently elastic

Options

- 126581 - 4kg Tub: White
- 144615 - 22kg Tub: White

Soudatape OC

DESCRIPTION

Preformed tape for placement in the outside corners, pack includes 2 pcs of outside corners.

Options

126577 - L: 2X 120mm, W: 150mm: White

Soudatape IC

DESCRIPTION

Preformed tape for placement in the inside corners, pack includes 2 pcs of inside corners.

Options

126578 - L: 2X 105mm, W: 150mm: White

Soudatape ST

DESCRIPTION

Sealing tape for floor and wall and the wall junctions - 10 lineal meters per box.

Options

126579 - L: 10m, W: 120mm: White

Soudatape PD

DESCRIPTION

Preformed cuffs for placement around pipes and drains, pack includes 2x100mm + 1x150mm cuffs.

Options

126576 - D: 2X 100mm, 1X 150mm: White

Soudatight Geotextile

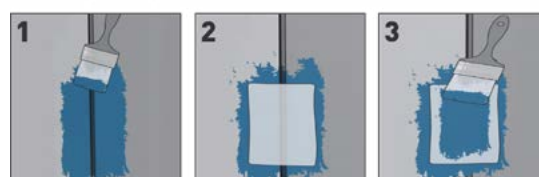

DESCRIPTION

A non-woven fabric out of polypropylene, needle punched and heat treated, produced without adhesive or chemical binder for use in combination with the Soudagum Hydro at seam-, gap and crack-bridging applications.

Options

131003 - L: 15m, W: 15cm: White

HOW TO USE SOUDATIGHT GEOTEXTILE WITH SOUDAGUM HYDRO

BUILD THE FUTURE

Surface Activator

DESCRIPTION

UNIVERSAL cleaner, degreaser and primer. Used for activating non-porous surfaces to achieve an improved adhesion. Cleaning, degreasing and activating of non-porous substrates.

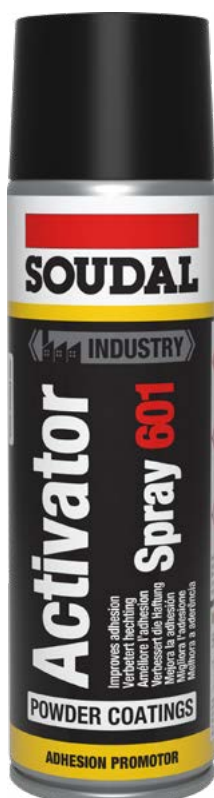

APPLICATIONS

Cleaning of non-porous surfaces prior to the application of silicones, polyurethanes, hybrid polymers and polysulphides.

- Liquid surface activator for non-porous surfaces
- Cleans, degreases and activates
- Universal use, can be used with many types of sealants and adhesives
- One component - easy to use
- Clear

Options

- ☐ 101638 - 500ml Bottle: Clear
- ☐ 113596 - 5L Bottle: Clear

Activator Spray 601

DESCRIPTION

UNIVERSAL aerosol applied surface activator for use with silicone, PU and hybrid polymer based sealants and adhesives. Used to improve the adhesion on anodized, lacquered and powder coated aluminium. Mild smelling. Fast drying. Compatible with most lacquered surfaces. Also suitable for most plastics and other metals.

APPLICATIONS

Priming of anodized, lacquered and powder coated aluminium surfaces prior to the application of silicone and hybrid polymer sealants and adhesives.

- Aerosol applied liquid surface activator
- For use on powder coated aluminium
- Activates and primes
- Works with silicone and hybrid polymers
- One component - easy to use
- Clear

Options

- ☐ 134507 - 500ml Aerosol: Clear

Primer 100

DESCRIPTION

UNIVERSAL one part, porous surface primer. Liquid, easy to apply. Suitable for all professional sealants and adhesives based on polyurethane, polysulphide and hybrid polymers.

APPLICATIONS

Priming of expansion joint surfaces. Joint surfaces of porous materials with high water exposure.

- Liquid primer for porous substrates
- Universal use; can be used with polyurethane, polysulphide and hybrid polymers
- One component - easy to use
- Clear

Options

- 123012 - 500ml Bottle: Clear

Primer 150

DESCRIPTION

UNIVERSAL one part, porous surfaces primer. To be used with silicone sealants, hybrid polymer sealants and adhesives. Liquid, easy to apply.

APPLICATIONS

Priming of expansion joint surfaces. Joint surfaces of porous materials with high water exposure.

- Liquid primer for porous surfaces
- Universal use, can be used with silicones and hybrid polymers
- One component - easy to use
- Clear

Options

- 123011 - 500ml Bottle: Clear

Soudaprim DP

DESCRIPTION

A solvent-free, ready to use deep priming polymer dispersion with plasticizer, a flow controlling agent and preservation additives. The very fine particles make it a sealer, and its very low viscosity gives it a higher penetrating capacity compared to other primers.

APPLICATIONS

To be used as a primer before application of a waterproofing membrane on indoor floor and wall surfaces that are porous substrates like concrete, cement, gypsum boards, cement sheet, etc. Once applied, it can be coated with a liquid membrane such as SOUDAGUM LM.

- Can be over coated in just 1 hour
- Deep penetration nano-particles
- Strengthens substrate
- Binds dust
- Limits absorption by substrate
- Consumption = 100 - 200 mL / m² (1 coat)

Options

- 126575 - 1L Bottle: Pink
- 126574 - 5L Bottle: Pink

Adhesive Remover

DESCRIPTION

Transparent solvent mixture suitable for removing fresh glue stains and for the cleaning and degreasing of metal surfaces.

APPLICATIONS

Transparent solvent mixture suitable for removing fresh glue stains. Cleans brushes, palette knives and spatulas. Removes excess contact adhesive. Not suitable for polystyrene and Plexiglas. May damage certain surfaces (e.g. plastics).

- Removes fresh glue stains
- Cleans and degreases
- Does not leave residue
- Aerosol can be used at any angle (360°)

Options

- 119710 - 400ml Aerosol Spray: Transparent

Sealant Remover

DESCRIPTION

A ready-to-use and fast-working spray based on terpenes for removing hardened silicones and Hybrid Polymers. Can be applied on most surfaces, including aluminium, coatings, ceramics, laminated board, paint and certain plastics.

APPLICATIONS

Removal of old silicone residue, spilled silicone or spilled Hybrid Polymers from different kind of surfaces.

- Fast-working
- Does not drip
- Specifically for silicones and Hybrid Polymers
- Spray action

Options

- 119709 - 400ml Aerosol Spray: Transparent

Brake Cleaner

DESCRIPTION

Powerful, fast-drying cleaner for brake and clutch parts.

APPLICATIONS

Removes excess brake fluid, excess oil, dirt, etc. quickly. Prevents squeaking brakes and clutch slipping. Easy to apply from all angles and does not corrode metals.

- Cleans and degreases
- Does not drip
- Quick-drying
- Does not corrode metals
- Prevents squeaking sounds
- Aerosol can be used at any angle (360°)

Options

- 119712 - 400ml Aerosol Spray: Transparent

Cleaner & Degreaser

DESCRIPTION

Powerful quick-drying cleaner and degreaser for various maintenance and assembly jobs. Can be used on most surfaces (metal, plastics, PVC) and leaves no residue.

APPLICATIONS

Suitable for cleaning and degreasing mechanical parts. Also suitable for the preparation of surfaces prior to the application of sealants or adhesives. For the removal of uncured excess hybrid, PU or silicone sealants, tar residue, grease, wax.

- Cleans and degreases
- Leaves no residue
- Quick-drying
- Aerosol can be used at any angle (360°)

Options

- 119708 - 400ml Aerosol Spray: Transparent

Multi Cleaner

DESCRIPTION

A universal cleaning foam spray. Foam action helps to break down dirt and contaminants. Foam product means it does not drip or run.

APPLICATIONS

Ideally suited for cleaning vertical surfaces such as glass, tiles, mirrors, laminate, PVC, kitchens, car interiors, textile, carpets, office equipment, etc.

- Cleans and degreases
- Highly soluble
- Does not drip
- Does not leave any residues
- Foam action

Options

- 119711 - 400ml Aerosol Spray: Transparent

Multi Spray

DESCRIPTION

High grade universal spray with 8-fold action: dust remover, lubricant, cleaner, penetrating oil, anti-corrosive, damp repellent, shock and contact spray. It does not corrode plastics or metals and leaves a protective film on surfaces after use.

APPLICATIONS

Universal use product that can be used on many components such as screws, bolts, nuts, moving parts, axles, hinges, chains and garden tools.

- Universal use spray
- 8-fold action
- Can be used on metals, plastics and rubbers
- Aerosol can be used at any angle (360°)

Options

- 119707 - 400ml Aerosol Spray: Transparent

PTFE Spray

DESCRIPTION

High grade PTFE based lubricant. Repels water and dirt. Long life protection against friction and wear. Excellent mechanical and thermal stability. High penetration characteristics.

APPLICATIONS

Used for parts subject to high pressure and temperature loads, especially metals and plastics. Applications include pulleys, chains, gears, ball bearings, conveyer belts and other critical applications.

- PTFE based
- High pressure & temperature resistance
- Long life protection
- Lubricates and protects
- Aerosol can be used at any angle (360°)

Options

- 119705 - 400ml Aerosol Spray: Transparent

Silicone Spray

DESCRIPTION

Transparent lubricating and anti-adhesive spray based on high performance silicone oils. Lowers friction and prevents wear and tear on mechanical components. Prevents dirt and grease build up. Very high temperature resistance.

APPLICATIONS

Used on plastics and rubbers to lubricate and protect. Typical applications include sliding doors and rubber seals, lubricating gutter and pipe seals.

- Silicone based
- Transparent
- Lubricates and protects
- Very high temperature resistance
- Aerosol can be used at any angle (360°)

Options

- 119704 - 400ml Aerosol Spray: Transparent

Vaseline Spray

DESCRIPTION

Transparent lubricating and protection spray. Dilutes acids and alkalis, and prevents general wear and tear. High temperature resistance.

APPLICATIONS

Used on metals and plastics to protect against water and weather conditions. Typical applications include door and window hinges, nuts, screws, garden tools and rolling shutters.

- Silicone based
- Transparent
- Lubricates and protects
- Very high temperature resistance
- Aerosol can be used at any angle (360°)

Options

- 119703 - 400ml Aerosol Spray: Transparent

White Grease

DESCRIPTION

Lithium soap and PTFE based penetrating lubricant and grease. Waterproof. Double action effect; applies like oil, then sets like grease. Anti-corrosive properties.

APPLICATIONS

Suitable for heavy duty lubrication of mechanical parts such as ball bearings, axles, sprockets, conveyer belts and rubber seals.

- Lithium and PTFE based
- Double action oil and grease
- Anti-corrosive
- Heavy duty applications

Options

- 119706 - 400ml Aerosol Spray: Transparent

Contact Spray

DESCRIPTION

Universal spray for the cleaning and maintenance of electric contact areas. Dissolves corrosion and oxidation. Reduces humidity. Non corrosive. Suitable for interior and exterior applications.

APPLICATIONS

Suitable for electric contact points such as switches, batteries and light switches. Cleans and deoxidizes surfaces and improves the power transmission at electric contacts. Stops moisture penetration. Also suitable for dehumidifying of electric wirework and tools.

- Universal use
- Reduces humidity and corrosion
- Interior and exterior use
- Aerosol can be used at any angle (360°)

Options

- 119715 - 400ml Aerosol Spray: Transparent

Cutting Oil

DESCRIPTION

A high quality oil which prevents overheating of metals when cutting and drilling. Excellent anti-mist characteristics. Silicone free.

APPLICATIONS

Reduces resistance in cutting tools. Suitable for drilling, milling, cutting, sawing, filing, tapping, turning, planing and punching of steel and most ferrous and non-ferrous metals. Reduces friction and wear. Excellent cooling characteristics.

- Non corrosive, does not contain silicones
- Can be used with most metals
- Anti-misting properties
- Aerosol can be used at any angle (360°)

Options

- 119717 - 400ml Aerosol Spray: Transparent

Degrip All

DESCRIPTION

A high quality penetrating oil which dissolves rust and corrosion. Superior penetrating characteristics. Protects against rust and corrosion.

APPLICATIONS

Highly efficient in releasing corroded and rusted metal parts such as nuts, bolts and machine parts. Due to the very low surface tension it penetrates into very small openings to release stuck parts. Can be used with machinery, nuts, bolts, flanges, etc.

- Penetrating action
- Dissolves and protects against rust
- For interior and exterior applications
- Aerosol can be used at any angle (360°)

Options

- 119716 - 400ml Aerosol Spray: Transparent

Zinc Spray (Matt)

DESCRIPTION

High-grade zinc spray with sprayable zinc compound (98% zinc). Has a galvanizing action. Protects zinc and unprocessed iron and steel against corrosion. Due to its cathode action, the spray is very economical and effective. Matt finish.

APPLICATIONS

To be used for coachwork, gutter braces, weld joints and spot welding. Can be used on rust. Good electrical conductor.

- Good resistance against mechanical shocks, rubbing and erosion
- Matt finish
- Suitable over spot welding
- Good electrical conductor

Options

- 155885 - 400ml Aerosol Spray: Grey

Zinc Spray (Shiny)

DESCRIPTION

High-grade sprayable alu-zinc compound. Alu-Zinc spray has a galvanizing action. Protects zinc and unprocessed iron and steel against corrosion. Due to its cathode action, the spray is very economical and effective.

APPLICATIONS

To be used for coachwork, gutter braces, weld joints and spot welding. Can be used on rust. Good electrical conductor.

- Shiny finishing coat
- Good resistance against mechanical shocks, rubbing and erosion
- Very economic, effective and reliable
- Suitable over spot welding

Options

- 154608 - 400ml Aerosol Spray: Silver

Soudafix CA1400

DESCRIPTION

High performance, two-component anchoring resin for the pressure-free securing of anchoring rods, studs, reinforcing bars, threaded collars, profiles, etc. in structural and high load applications.

APPLICATIONS

Suitable for various solid and hollow materials, such as concrete, cracked concrete, solid brick, hollow brick, porous concrete, natural stone, plasterboard walls, etc.

- Easy to use and to apply
- Can be applied with standard caulking gun
- Fast cure and styrene free (low odour)
- Can be used in wet drill holes, even underwater
- Watertight and impermeable fixin

Options

- 125538 - 165ml Cartridge: Grey
- 125539 - 280ml Cartridge: Grey

Soudafix VE400-SF

DESCRIPTION

A two-component anchoring resin for the pressure-free securing of threaded rods (ETA: M8-M30), studs, reinforcement bars (ETA: Ø8-Ø32), threaded collars, profiles etc in various solid and hollow materials, such as cracked and uncracked concrete, solid brick, hollow brick, porous concrete, natural stone, plasterboard walls, etc. Soudafix VE400-SF has a fire resistance class of F120 and has a high resistance to chemicals.

APPLICATIONS

Securing of heavy loads in solid and hollow building materials. Pressure free anchoring even close to edges. Can be used as repair mortar.

- High compression strength
- High fire resistance F120
- Easy to use and to apply
- Fast cure and styrene free
- Can be used in wet drill holes, even underwater

Options

- 117475 - 380ml Cartridge: Grey

SWIPEX

SUPER CLEANING WIPES

- Cleans hands, tools & surfaces
- Works with silicone, hybrid polymers, PU foam and adhesives
- Quick, easy and safe to use
- 100 wipes per tub

Swipex Wipes

DESCRIPTION

Swipex is a cleaning wipe ideal for removing all fresh sealants, adhesives and foam from surfaces, hands and tools. It also removes grease and oil. The formula contains skin conditioning agents to avoid excessive skin dehydration. Safe to use.

Dissolves fresh und cured adhesives and sealants (silicone, hybrid, PU, acrylic, etc) as well as PU-foam, all paints, including automotive, etc. Cleaning of dirty working tables and surfaces.

APPLICATIONS

- Dissolves fresh und cured adhesion and sealant remains (Silicone, MS Polymer, PU, Acryl...) as well as PU-foam, paint etc.
- Cleaning of dirty working tables and surfaces.

Options

113551 - Tub: 100 Wipes

128470 - Flow Pack: 50 Wipes

Swipex Hand Cleaner

DESCRIPTION

HEAVY DUTY cleaner to remove all kinds of dirt from your hands. Granular texture helps to scrub dirt away. Suitable for removing adhesives, silicone and PU foam. Contains Sericin with moisturiser that protects skin and hands.

APPLICATIONS

Suitable for the removal of adhesives, silicone, PU foam, paint and oil from hands.

- Heavy duty hand cleaner
- Granular texture to help remove dirt quickly
- Fast acting and drying
- Contains Sericin which moisturises hands
- Works on adhesives, PU foam, silicone, paint and oil

Options

127329 - 1L Bottle: Red

Cartridge Gun Skeleton

DESCRIPTION

Steel skeleton gun. Soudal dripless system. Suitable for all cartridge applied adhesives, fillers and sealants.

Options

111072 - 310ml Manual Cartridge Gun - Yellow

Cartridge Gun Heavy Duty

DESCRIPTION

Heavy duty steel skeleton gun featuring the Soudal dripless system. Even pressure distribution for perfect application. Suitable for all cartridge applied adhesives, fillers and sealants. Ideal for thicker high viscosity adhesives and sealants due to a ratio of 18:1.

Options

106617 - 310ml Manual Cartridge Gun - Black

Heavy Duty Barrel Sausage Gun

DESCRIPTION

Soudal manual foilpack gun. Can be used with all foilpack products.

Options

112802 - 600ml Manual Foil Gun with Spare Clear Barrel

118142 - Plunger Push Disk Spare Part

410ml Chemical Anchor Gun

DESCRIPTION

Gun for coaxial 2-component cartridge of 380ml – 410ml.

Options

103265 - 410ml: Red/Black

PRO PU Foam Gun

DESCRIPTION

PROFESSIONAL GRADE polyurethane applicator gun for use with gun foams.

APPLICATIONS

For the application of PU foams and cleaners.

Options

137930 - Gun Grade: Standard Size

1 Meter PU Foam Gun

DESCRIPTION

HEAVY DUTY PROFESSIONAL GRADE metal polyurethane applicator gun for use with gun foams. 1 meter reach for easier accessibility in harder to reach areas.

APPLICATIONS

For the application of PU foams and cleaners.

Options

119559 - Gun Grade: 1m Extra Long Barrel

Economy PU Foam Gun

DESCRIPTION

PROFESSIONAL GRADE metal polyurethane applicator gun for use with gun foams.

APPLICATIONS

For the application of PU foams and cleaners.

Options

168707 - Gun Grade: Standard Size

Pneumatic Applicator Sausage Gun

DESCRIPTION

A premium quality applicator gun. Suitable for dispensing 600ml sausages.

APPLICATIONS

For the application of PU foams and cleaners.

- Made in England
- True adjustable air regulator
- Instant dump valve

Options

126784 - Aluminium

Pneumatic Applicator Cartridge Gun

DESCRIPTION

A premium quality applicator gun. Suitable for dispensing 300ml cartridge.

APPLICATIONS

For the application of PU foams and cleaners.

- Made in England
- True adjustable air regulator
- Instant dump valve

Options

126786 - Aluminium

Gun & Foam Cleaner

DESCRIPTION

SOLVENT BASED aerosol spray applied, polyurethane foam cleaner.

APPLICATIONS

Used for the cleaning of PU Foam applicator guns. Gun applied PU Foam valves and uncured PU Foam, can also be quickly and easily removed with the attachable spray nozzle.

- Solvent based PU Foam cleaner
- Quick & easy to use
- Attachable spray nozzle
- Aerosol applied

Options

- 106310 - 500ml Gun & Foam Cleaner (Screw Top): Clear

Foam Remover

DESCRIPTION

GEL BASED PU foam cleaner. Odourless and free of aromatic solvents.

APPLICATIONS

For the quick and easy removal of cured polyurethane foam residues from nonporous surfaces such as plastics, metals and PVCu.

- Gel based cleaner
- Virtually odorless
- Can be applied by brush or spatula
- Highly effective
- Solvent free

Options

- 115778 - 100ml Bottle: Clear

Silicone Remover

DESCRIPTION

TERPENE based, easy to use cleaning gel for the removal of cured silicone sealants. Applied by brush or spatula. Non sagging.

APPLICATIONS

Used to remove all cured silicone sealants, especially on non-porous surfaces. Can also be used with Hybrid Polymer based sealants and adhesives.

- Terpene based
- Works on silicones and hybrid polymers
- Brush applied
- Non sagging
- Fast and effective

Options

- 102853 - 100ml Bottle: Clear

45° Nozzle Connector

Options

103002 - 5 pack

175 Mm Long Nozzle

Options

102992 - 5 pack

Sausage Nozzle

Options

305984 - single pack

Cartridge Nozzle

Options

305953 - single pack

Nozzles With Cap

Options

108762 - 5 pack

Static Mixer Pro

Options

117596 - single pack

Static Mixer

Options

119561 - 10 pack

PU Foam Adaptor Nozzles

DESCRIPTION

Spare nozzles / straws for manually applied foams.

Options

102998 - Nozzle Set (5 Pack)

Twisty Nozzles

DESCRIPTION

TWISTABLE sealant and adhesive nozzles. Re-sealable after use.

APPLICATIONS

Used with all standard sealant, adhesive and filler cartridges. Useful for sealing, filling and bonding into hard to access areas e.g. around pipes

- Compatible with all standard cartridges
- Fully twistable, up to 90° angle
- Allows access into difficult areas
- Re-sealable

Options

117773 - Nozzle Set (5 Pack)

Multi Tool

DESCRIPTION

Easy to use universal scraper to remove old sealant joints. Made out of special material to avoid damage to the surface. Used in 3 different ways: pushing, pulling and scraping.

- Very sharp
- Re-useable
- Easy to use

Options

119352 - Sealant Scraper: Red

Silicone Spatula Kit

DESCRIPTION

Flexible joint smoothing tool made from a special plastic for the tooling of sealing tools. The specially developed tool edges enable the fast and easy tooling required to achieve perfectly smooth joints.

- Many different angles to give desired joint
- For a professional finish
- For smoothing and shaping joints

Options

168709 - 7 piece smoothing tool kit

Joint Finish

DESCRIPTION

For the smoothing of all types of joints immediately after application of the sealant. Effective smoothing agent for a professional finish.

- Easy to use
- Makes smoothing sealants easy
- Suitable for acrylics, silicones, SMX® and hybrid sealants

Options

119354 - 500ml Spray Bottle: Clear

106285 - 1L Spray Bottle: Clear

107502 - 5L Spray Bottle: Clear

Cartridge Cutter

DESCRIPTION

HIGH QUALITY cartridge cutter.

APPLICATIONS

Used for cutting cartridges and nozzles safely and quickly.

- Cuts cartridges and nozzles
- Quick and safe

Options

168708 - Single unit

Soudaglatt

DESCRIPTION

Flexible joint smoothing tool for professional finish.

- Very sharp
- Re-useable
- Easy to use

Options

112596 - Smoothing tool: White

Trowel

DESCRIPTION

Professional quality notched trowel adhesive spreader. Available in two sizes: Small bead size (Nr 3) and Large beads size (Nr 11).

- German made
- High quality
- Comfortable

Options

- 112946 - Small Nr3
- 112945 - Large Nr11

Backer Rods

DESCRIPTION

POLYURETHANE based open cell backer rods. Supplied in 1M lengths.

APPLICATIONS

Used to control depth and shape of sealant joints and avoid 3 sided adhesion.

- PU based
- Grey colour
- Various diameters

Options

110308 - 10mm	110286 - 30mm
110283 - 15mm	110287 - 40mm
110284 - 20mm	110288 - 50mm
110285 - 25mm	

Heavy Duty Red Cases

DESCRIPTION

Heavy duty plastic case with folding lid, can be locked with a padlock, and also stackable.

Options

- 300034 - Stackable Red Case

Heavy Duty Black Crates

DESCRIPTION

Heavy duty plastic crate with handle for storing and carrying cartridges easily.

Options

- 317197 - Black crate
